What is the Selling Partner API?

Selling Partner API Onboarding Overview >

Cancel a shipment

Learn how to use the Merchant Fulfillment API to cancel a shipment.

Learn how to use the Merchant Fulfillment API to cancel a shipment.

Prerequisites

To complete this tutorial, you need:

- Authorization from the selling partner for whom you are making calls. For more information, refer to [Authorizing Selling Partner API applications](#).
- The [Direct-to-Consumer Shipping \(Restricted\)](#) role assigned to your developer profile.
- The [Direct-to-Consumer Shipping \(Restricted\)](#) role

Learn How Sellers Authorize Service Providers

Selling Partner API Roles >

Step 1. Call the `cancelShipment` operation

Note

This is a restricted operation and requires a Restricted Data Token (RDT) for authorization. Some operations require restrictions because they contain customer PII data. These operations require passing an additional security review. For more information on RDT, refer to the [Tokens API](#) guide.

Call the
`cancelShipment`
operation and specify
the `ShipmentId` value

[Policies and Agreements](#)[About Facial Data](#)

AUTHORIZATION

[Authorize Applications](#) >[Renew Authorizations](#)[Revoke Authorizations](#)[Authorization Limits](#)[Special Authorization Types](#) >

INTEGRATION

[Building Robust Amazon SP-API Applications](#) >[SP-API SDKs](#)[Cancel a shipment](#)

of the shipment you want to cancel.

This returns the details of a shipment, which includes the shipment status. It might also return one or more unexpected errors occurred during the `cancelShipment` operation.

Step 2. (Optional) Check the status of the canceled shipment

Note

This is a restricted operation and requires a Restricted Data Token (RDT) for authorization. Some operations require restrictions because they contain customer PII data. These operations require passing an additional security review. For more information

Tutorial: Automate your SP-API Calls Using a Python SDK

Cancel a shipment

on RDT, refer to the [Tokens API guide](#).

1. Call the `getShipment` operation and specify the `ShipmentId` value for the canceled shipment.
2. Get the cancellation status from the status element returned by the `getShipment` operation.

! Errors

The service returns the `LabelCancellationWindowExpired` error if the allotted time period for canceling a label has expired. Refer to [Error codes](#).
