Confirm the shipment status

Learn how to use the Orders API to confirm the shipment status.

Learn how to use the [Orders API](#) to confirm the shipment status. You don't need to confirm the shipment if you purchase a shipping label through the Shipping API or buy-shipping UI. The `confirmShipment` operation supports all use cases that were supported in the Order Fulfillment Feeds, including supporting multiple tracking IDs per order.

🚧 Important

Ship+ orders do not support the `confirmShipment` operation and result in a `400` error as they don't require manual confirmation.

To submit multiple package tracking IDs, you must send multiple requests with the same order ID but different package reference IDs.

Example:

Call	OrderID	PackageReferenceId
1st Call	902-0300094-570542	101
2nd Call	902-0300094-570542	102

The package reference ID supports any positive numerical value and is meant for the purpose of editing a shipment after you have confirmed a shipment. You can submit any numerical value as `packageReferenceID` . If you need to make an edit to the shipment,

submit another `confirmShipment` operation with the same `packageReferenceID`. The other shipment details are edited upon successful submission. If you do not put any ID when you submit, Amazon automatically assigns a `packageReferenceID`.

Prerequisites

To complete this tutorial, you need:

- Authorization from the selling partner for whom you are making calls. For more information, refer to [Authorizing Selling Partner API applications](#).
- The [Inventory and Order Tracking](#) role assigned to your developer profile.
- The [Inventory and Order Tracking](#) role selected in the app registration page for your application.

If you have been approved for the [Direct-to-Consumer Delivery \(Restricted\)](#) role, you can access the `confirmShipment` operation.

Step 1. Confirm a shipment for one order

Call the `confirmShipment` operation, passing an `orderId` in the path and the following parameters in the body:

- `packageDetail`
- `codCollectionMethod`
- `marketplaceId`

`confirmShipment` request example (shipment confirmation step)

JSON

```
POST https://sellingpartnerapi-eu.amazon.com/orders/v0/orders/205-1725759-9209952/shipmentConfirmation
{
  "marketplaceId": "ATVPDKIKX0DER",
  "codCollectionMethod": "",
  "packageDetail": {
    "packageReferenceId": "123",
    "carrierCode": "UPS",
    "carrierName": "UPS",
    "shippingMethod": "SHIPPING",
    "trackingNumber":
"1Z86V8030385598957",
    "shipDate": "2022-11-
```

Step 2. Edit shipping information for one order

After Step 1, a package is created for the order. You can edit the shipping information like Ship date, Carrier, Shipping service (or Ship method), Tracking ID (supplied by the carrier) by calling the [confirmShipment](#) operation again.

Parameters that need to be consistent

To ensure that you are editing the same shipment, do not change the following parameters:

- orderId
- packageReferenceId
- orderItemId
- quantity
