Create a Japan order with scheduled delivery and delivery time windows

Learn how to create orders for Japan with the scheduled delivery shipping option. This ship option is only available for Japan marketplace orders.

Learn how to create orders for Japan with the scheduled delivery shipping option. This ship option is only available for Japan marketplace orders.

Prerequisites

To complete this tutorial, you need:

- Authorization from the selling partner for whom you are making calls. Refer to [Authorizing Selling Partner API Applications](#) for more information.
- The [Amazon Fulfillment role](#) assigned to your developer profile.
- The [Amazon Fulfillment role](#) selected in the App registration page for your application.

Step 1. Get the fulfillment preview for scheduled delivery dates

Call the `getFulfillmentPreview` operation. Set `shippingSpeedCategories` equal to `ScheduledDelivery` and `includeDeliveryWindows` equal to `true`.

Step 2. Create a fulfillment order

Call the `createFulfillmentOrder` operation with the Delivery Window obtained from the `getFulfillmentPreview` response and with `shippingSpeedCategory` set to `ScheduledDelivery`. If you use any other window with the `createFulfillmentOrder` operation, the service returns an error and you must call `getFulfillmentPreview` again.

Note

Shipping method service-level agreements vary by marketplace. Sellers can refer to [Seller Central](#) for shipping method service-level agreements and multi-channel fulfillment fees.

Performance Management

- Step 3. Get the fulfillment order to validate order details
- After successfully calling the `createFulfillmentOrder` operation, call the `getFulfillmentOrder` operation to validate that the `fulfillmentAction` value is equal to `Ship` and `fulfillmentOrderStatus` is equal to `Received`.
