Create and onboard an app notification template

Learn how to use the App Integrations API to set up an app notification template.

You can use the App Integrations API to create and onboard your app notification templates.

Prerequisites

To complete this tutorial, you need:

- Authorization from the selling partner for whom you are making calls. For more information, refer to [Authorizing Selling Partner API Applications](#).
- The [Notifications in Seller Central role](#) assigned to your developer profile.
- The Notifications in Seller Central role selected in the App Registration page for your application.

Step 1. Create your notification template draft

1. Sign in to Seller Central using the [appropriate URL](#) for your marketplace.
2. Navigate to the [Developer Console](#).
3. Choose **Action**, then choose **App Integration**.
4. Choose **Create a notification template**.
5. On the notification template form, add the following information:
 - **Source language for template:** Select the language used to provide the listing information.

Create and onboard an app notification template

- **Template type:** Input the name of your notification template. Format the identifier using all capital letters, with an underscore to separate words. For example, `RESTOCK_LOW_INVENTORY`.
- **Template content:** Specify the message that is displayed in the notification to the seller. This message must include between one and five parameters. Limit your message to 250 characters.
- **Parameters:** Specify the parameters and their supported types.

The following types of parameters are supported:

Parameter type	Description	Example of a valid value	
number	Integers or floating point numbers	5, 100.50	
date	The date in YYYY-MM-DD format	2022-07-30	
ASIN (enum)	The ASIN value	B09ZX1LRXX	

- **Template CTA URL:** Specify the URL that relates to the seller's call-to-action. This section is required. If you do not have a URL that relates to the seller's call-to-action, populate this field with the URL to your website.
- **Expected action from sellers:** Choose the action that the seller is expected to take based on the notification. Select the option that applies to your notification.
- **Template topic:** Choose the template type category. Select the option that applies to your notification. If none of the options apply, select **Other** and provide a category name.
 - **Template topic - Other:** Provide a category name.
- **Template granularity level:** Choose whether you want your template available at the marketplace level or the regional level. If you don't specify, your template defaults to the regional level. For a list of supported regions and marketplaces, refer to [Marketplace IDs](#).

! Important

Do not use HTML reserved characters (" , ' , & , < , or >) in any description. Including these characters delays the publishing of your notification.

6. After you have completed the notification template form, choose **Preview**.
7. On the **Preview** tab, review the notification for any errors. To make edits, close the **Preview** tab, and choose **Edit** on the notification template form.
8. After you edit your template, choose **Save** to save your edits.

Example notification templates

The following example shows a template for the fictitious `RESTOCK_LOW_INVENTORY` notification type.

Template type: `RESTOCK_LOW_INVENTORY`

Template content: You have

`${NumberOfProducts}` products running low on inventory. Restock your inventory by clicking here.

Parameters: numberOfProducts: **number**

Template CTA URL: -

Sample content: You have **5** products running low on inventory. Restock your inventory by clicking here.

Marketplace or region: -

Expected action from seller: -

Template topic: -

The following example shows a template for the fictitious `SALES_SUMMARY` notification type.

Template type: `SALES_SUMMARY`

Template content: Your sales summary as of

`${summaryAsOnDate}` is `${salesSummaryInUSD}` USD

Parameters: summaryAsOnDate: **date**

salesSummaryInUSD: **number**

Template CTA URL: -

Sample content: Your sales summary as of **2022-08-30** is **1000.50** USD

Marketplace or region: -

Expected action from seller: -

Template topic: -

SELLING PARTNER APPSTORE

What is the Selling Partner Appstore?

List Your App on the Selling Partner Appstore

Create and onboard an app notification template

Step 2. Submit your notification template for review

1. On the **App Integration** page, choose the **Draft** tab.
2. Select the notification templates that are ready for submission. You can select up to 10 notification templates.
3. Choose **Submit for review**.

Step 3. Check the status of your notification template

The notification template publishing process includes review and translation. You can track the status of your template on the [Developer Console](#).

1. Sign in to Seller Central using the [appropriate URL](#) for your marketplace.
2. Navigate to [Develop Apps](#).
3. In the Developer Console, choose **Action**, then choose **App Integration**.
4. On the **App Integration** page, choose **In Review**.
5. Check that your submitted notification template is marked as **Submitted**. You can preview a submitted template, but you can't edit it.
6. After Amazon approves and translates the template, navigate to the Developer Console and choose **App Integrations**. Then, choose **Published**.

Tip

If your template is not approved, feedback is provided with your template submission on the **Drafts** tab. Address the feedback and resubmit your template for review.

Step 4. Launch your new notification template

1. After your template is published, [relist your application in the Selling Partner Appstore](#). After your application is relisted, Amazon

- Edit Your Appstore Listing
- Check Listing Status
- Appstore Ratings and Reviews
- Press Releases and Promotions
