Create orders with Blank Box and Block AMZL features requested

Learn how to create orders with Blank Box and Block AMZL features requested.

Learn how to create orders with Blank Box and Block AMZL features requested.

When creating an order, MCF offers two features which can be specified in the request:

- Blank Box: Allows the seller to choose boxing with no Amazon logos/labels on it.
- Block AMZL: Allows the seller to refuse Amazon logistics and rather ship out using another carrier service.

Learn How Sellers Authorize Service Providers

Selling Partner API Roles >

After the request is made during the create order process, it cannot be updated during the fulfillment steps of the order.

Prerequisites

To complete this tutorial, you need:

- Authorization from the selling partner for whom you are making calls. Refer to [Authorizing Selling Partner API Applications](#) for more information.
- The [Amazon Fulfillment role](#) assigned to your developer profile.
- The [Amazon Fulfillment role](#) selected in the App registration page for your application.

Step 1. Get a fulfillment preview for given feature constraints

Call the

`getFulfillmentPreview` operation on the line items of the order using a given ship option and feature constraint to ensure that the features are available for order fulfillment for the

marketplace and
address.

INTEGRATION

Building Robust Amazon SP-API Applications

SP-API SDKs

>

Step 2. Create a fulfillment order specifying the feature constraints

Call the

`createFulfillmentOrder` operation to

create an MCF order
specifying the feature
constraints required for
the order.

Feature constraints

Feature
constraints
can be
enabled in
the [Seller
Central](#)
portal which
acts as a
default
value, but
the value
specified in
the order
request takes
priority.

Step 3. Get the fulfillment order to validate order details

After successfully creating an order, call the `getFulfillmentOrder` operation to validate that `fulfillmentAction` is equal to `Ship`, `fulfillmentOrderStatus` is equal to `Received`, and `featureConstraints` are returned in the order details response.
