Data Kiosk Query Processing Finished Notification

Detailed information on the Data Kiosk Query Processing Finished Notification.

DATA_KIOSK_QUERY_PROCESSING_FINISHED

Sellers and vendors can subscribe to this notification.

The `DATA_KIOSK_QUERY_PROCESSING_FINISHED` notification is sent when a Data Kiosk query finishes processing.

DATA_KIOSK_QUERY_PROCESSING_FINISHED Payload schema: Version 2023-11-15

A `DATA_KIOSK_QUERY_PROCESSING_FINISHED` notification with `payloadVersion = 2023-11-15` includes the following properties in the `payload` object:

Name	Description	Required
<code>accountId</code>	The merchant customer ID or vendor group ID of the selling partner account that the query was submitted on behalf of. Type: string	Yes
<code>queryId</code>	The query identifier. This identifier is unique only in combination with the <code>accountId</code> . Type: string	Yes
<code>query</code>	The submitted query. Type: string	Yes
<code>processingStatus</code>	The processing status of the query. Type: string	Yes
<code>dataDocumentId</code>	The data document identifier. This document identifier is only present when there is data available as a result of the query. This identifier is unique only in combination with the <code>accountId</code> . Pass this identifier into the <code>getDocument</code> operation to get the information required to retrieve the data document's contents. Type: string	No
<code>errorDocumentId</code>	The error document identifier. This document identifier is only present when an error occurs during query processing. This identifier is unique only in combination with the <code>accountId</code> . Pass this identifier into the <code>getDocument</code> operation to get the information required to retrieve the error document's contents. Type: string	No

Name	Description	Required
pagination	When a query produces results that are not included in the data document, pagination occurs. This means all results are divided into individual pages. To retrieve the next page, you must pass a <code>CreateQuerySpecification</code> object with <code>paginationToken</code> set to this object's <code>nextToken</code> and with <code>query</code> set to this object's <code>query</code> in the subsequent <code>createQuery</code> request. When there are no more pages to fetch, the <code>nextToken</code> field will be absent. Type: Pagination	No

Pagination

Name	Description	Type
nextToken	A token that can be used to fetch the next page of results.	string
