Fulfillment Outbound API

Learn how to use the Fulfillment Outbound API.

You use the [Fulfillment Outbound API](#) to retrieve information about Multi-Channel Fulfillment (MCF) orders in Amazon's fulfillment network. You can create applications that help a seller fulfill Multi-Channel Fulfillment orders using their inventory in Amazon's fulfillment network. You can also get information on both potential and existing fulfillment orders.

Current version	Legacy versions	Availability	Sandbox
v2020-07-01 (Reference Model)	None	Sellers only	Dynamic

► [Release notes](#)

To learn more about the terms that are used in this guide, refer to [Terminology](#).

Use cases

The following use case examples are available for the Fulfillment Outbound API:

- [Retrieve proof of delivery for a delivered package](#): Get the photo or signature for a delivered Multi-Channel Fulfillment Outbound shipment.
- [Retrieve a list of fulfillment orders](#): Get a list of fulfillment orders after (or at) a specific date-time, or indicated by the next token parameter.
- [Retrieve delivery tracking information](#): Get delivery tracking information for a package in an outbound shipment for a Multi-Channel Fulfillment order.

Authorization Limits

- [Cancel a fulfillment order](#): Send a request to Amazon to stop attempts to fulfill a fulfillment order.
- [Retrieve a list of features](#): Get a list of features available for Multi-Channel Fulfillment orders in the marketplace you specify.
- [Retrieve inventory eligible for Blank Box](#): Get a list of inventory items that are eligible for Blank Box.
- [Retrieve Blank Box inventory for a specific SKU](#): Get the total number of feature seller SKUs with the `sellerSKU` you specify.
- [Create a Japan order with scheduled delivery and delivery time windows](#): Create orders for Japan with the scheduled delivery shipping option.
- [Create an MCF order for India](#): Create an MCF order for India.
- [Track a partially fulfilled order](#): Track a partially fulfilled order for items that are low inventory.
- [Create an order in hold status and then move it to shipped](#): Learn how an order can move from a fulfillment status of `HOLD` to `SHIP`.
- [Track an order with an item's serial number](#): Track an item for a seller who might need to know which instance of an item was sold to a particular customer.
- [Create an order with cross border fulfillment](#): Learn how a seller who operates and sells in two different countries can fulfill orders across the border.
- [Create orders with Blank Box and Block AMZL features requested](#): Learn how to create orders with Blank Box and Block AMZL features requested.
- [Show the preview details of all ship speeds](#): Get the preview details of all ships speeds.
- [View order notifications with the Notifications API](#): Subscribe to `FULFILLMENT_ORDER_STATUS` notifications to be aware of all the changes happening on the order.
- [Create a return for an MCF order](#): Create a return for an MCF order.
- [Get dynamic delivery offers](#): Get dynamic delivery offers for a buyable product using a US ZIP Code or US IP address.
- [Get recipient details for attended deliveries](#): Get recipient details for attended deliveries where someone other than the buyer received the package.
