What is the Selling Partner API?

Selling Partner API Onboarding Overview

Fulfillment by Amazon (FBA) Reports

FBA Reports for the Selling Partner Reports API.

There are limits to how often Amazon will generate FBA reports. These limits depend on whether an FBA report is a near real-time report or a daily report.

A near real-time FBA report is generated no more than once every 30 minutes. This means that after a near real-time FBA report is generated following your report request, a 30-minute waiting period must pass before Amazon will generate an updated version of that report. Note that the four "All Orders" reports are not subject to this limitation.

A daily FBA report is generated no more than once every four

price, courier, and tracking data. You can request up to one month of data in a single report. Content updated in near real-time in Europe (EU), Japan, and North America (NA).

**Note**

In Japan, EU, and NA, in most cases, there will be a delay of approximately one to three hours from the time a fulfillment order ships and the time the items in the fulfillment order appear in the report. In some rare cases there could be a delay of up to 24 hours.

VENDOR RETAIL PROCUREMENT TRANSACTION STATUS API

Vendor Retail Procurement Transaction Status API >

data by fulfillment center. Default:

COUNTRY .

Example:

```
"reportOptions"
:
{"aggregateByLocation":"COUNTRY"
}
```

- aggregatedByTimePeriod : Specify the time period to aggregate Summary View data accordingly (for example, MONTHLY , WEEKLY , DAILY , etc.). Default: MONTHLY .
 Example:

```
"reportOptions"
:
{"aggregatedByTimePeriod":"MONTHLY"
}
```
- FNSKU : Include FNSKU value to view report data for that particular FNSKU .
- MSKU : Include MSKU value to view report data for all active FNSKU mappings of that MSKU .
- ASIN : Include ASIN value to view report data for all active FNSKU mappings of that ASIN .

Report behaviors:

- You can pass multiple parameters to `ReportOptions` as shown in the following example:

```
"reportOptions"
:
{"eventType":"Adjustments",
"FNSKU" :
"X00001", "MSKU"
: "Test"}
```

- If `aggregateByLocation` is set as `FC`, Ledger Summary View will return data aggregated at FC level.
- If `aggregateByLocation` is set as `COUNTRY`, Ledger Summary View will return data aggregated at `COUNTRY` level.
- If `aggregatedByTimePeriod` is set as `DAILY`, Ledger Summary View will return data aggregated at the end of day. For example, `dataStartTime` is 2023-01-15T00:00:00+00:00 and `dataEndTime` is 2023-01-15T23:59:59+00:00

0 will return Jan
15th data.

- If `aggregatedByTimePeriod` is set as `MONTHLY`, Ledger Summary View will return data aggregated at the end of the month. `dataStartTime` must be set to first of the month and `dataEndTime` must be set to last day of the month to get monthly data. For example, `dataStartTime` of 2022-12-01T00:00:00+00:00 and `dataEndTime` 2022-12-31T00:00:00+00:00 will return December Month data.

- If `aggregatedByTimePeriod` is set as `WEEKLY`, Ledger Summary View will return data aggregated at the end of the week. `dataStartTime` and `dataEndTime` must be start and end of the week to get weekly data. For example, `dataStartTime` is 2023-01-09T00:00:00+00:00 and

`dataEndTime`
 2023-01-
 15T23:59:59+00:0
 0 will return
 weekly data of
 15th Jan.

- If no `reportOptions` are passed to request, Ledger Report Summary View will return data with `DEFAULT` options which is `COUNTRY` for `aggregateByLocation` and `MONTHLY` for `aggregatedByTimePeriod`.
- Ledger Report Summary View can return empty data if invalid `dataStartTime` / `dataEndTime` is passed along with `aggregatedByTimePeriod` filter values. (Refer to the behaviors for `aggregatedByTimePeriod` under report behaviors for the `GET_LEDGER_SUMMARY_VIEW_DATA` report type on how to set a valid `dataStartTime` / `dataEndTime` for appropriate `aggregatedByTimePeriod` filter options).

► [Select to expand](#)
[list of report](#)
[attributes.](#)

Inventory Ledger Report - Detailed View

reportType Value:

GET_LEDGER_DETAIL_V

IEW_DATA

Role: [Amazon](#)
[Fulfillment](#)

Requested/scheduled:

This report can only be requested.

Report output type:

Tab-delimited flat file

Use the Inventory Ledger Report - Detailed View to analyze your inventory movements to and from Amazon fulfillment centers, including products that are sold, returned, removed/disposed, damaged, lost, and found. You can view all historical movements of your inventory for 18 months in this report.

This report accepts the following

`reportOptions`

values:

- `eventType` :
Filters report data for a particular warehouse event.

Default is the empty string, which returns all events. Other possible values are as follows:

- Adjustments
- CustomerReturns
- Receipts
- Shipments
- VendorReturns
- WarehouseTransfers

Examples:

- ```
"reportOptions":
{"eventType": ""}
```
- ```
"reportOptions":
{"eventType": "Adjustments"}
```
- **FNSKU** : Include **FNSKU** value to view report data for that particular **FNSKU** .
- **MSKU** : Include **MSKU** value to view report data for all active **FNSKU** mappings of that **MSKU** .
- **ASIN** : Include **ASIN** value to view report data for all active

FNSKU mappings
of that ASIN .

You can pass multiple
parameters to
ReportOptions as
shown in the following
example:

```
"reportOptions":  
{ "eventType": "Adjustments",  
  "FNSKU" : "X00001",  
  "MSKU" : "Test" }
```

FBA Removal Order Detail Report

reportType Value:
GET_FBA_FULFILLMENT
_REMOVAL_ORDER_DETAIL_DATA

Roles: [Pricing](#), [Amazon Fulfillment](#)

Availability: FBA sellers

Requested/scheduled:
This report can only be requested.

Report output type:
Tab-delimited flat file

Contains all the removal orders, including the items in each removal order, placed during any given time period. This can be used to help reconcile the total number of

items requested to be removed from an Amazon fulfillment center with the actual number of items removed, along with the status of each item in the removal order. Content updated in near real-time.

FBA Removal Shipment Detail Report

reportType Value:

GET_FBA_FULFILLMENT
_REMOVAL_SHIPMENT_D
ETAIL_DATA

Roles: [Pricing](#), [Amazon Fulfillment](#)

Availability: FBA sellers

Requested/scheduled:

This report can only be requested.

Report output type:

Tab-delimited flat file

Provides shipment tracking information for all removal orders and includes the items that have been removed from an Amazon fulfillment center for either a single removal order or for a date range. This report will not include canceled returns or

disposed items; it is only for shipment information. Content updated in near real-time.
