Get Service Job Data

Learn how to obtain service job data to determine the Jobs that require a service seller to take action and the Jobs that need additional API calls.

Learn how to obtain Service Job data to determine the Jobs that require a service seller to take action and the Jobs that need additional API calls.

Obtain Service Job data with the following operations:

- `getServiceJobs` responds with a list of Service Jobs as constrained by filter inputs.
- `getServiceJobByServiceJobId` responds with Service Job details using Service Job IDs that `getServiceJobs` returns, or that the Seller Central Manage Jobs Download CSV

Report file
contains.

Learn How Sellers Authorize Service Providers

Selling Partner API Roles >

Prerequisites

To complete this tutorial, you need:

- Authorization from the seller for whom you are making calls. Refer to [Authorizing Selling Partner Applications](#) for more information.
- The [Professional Services role](#).

Step 1. Get all jobs created or updated during a time frame that you specify

The `getServiceJobs` operation:

- Gets the status of service jobs and appointments.
- Flags appointments that need a resource assignment, such as a technician.
- Manages route and fulfillment planning.

After fulfillment, you can use this operation along with `getServiceJobByServiceJobId` to audit

technician
performance.

Step 2. Get service job details

The

[getServiceJobByServiceJobId](#) operation

provides service sellers access to details about their service orders and their fulfillment, including:

- What orders are routed to service sellers.
- Appointment and job-level statuses.
- Orders that are already routed and need technician assignment.
- Technician assignment gaps.
- Amounts to be collected from customers on deliveries.

You can use this operation to determine technician on-time arrival, completion within slot, technician no-shows, and fulfillment breaks. After fulfillment, this operation can measure performance, which can be used to set up payment dashboards for sellers.
