Get a customer invoice

Learn how to use the Vendor Direct Fulfillment Shipping API to get a customer invoice (India only).

Learn how to use the Vendor Direct Fulfillment Shipping API to get a customer invoice (India only). The `getCustomerInvoice` operation returns information about the customer invoice that you specify using the purchase order number. The response includes complete customer invoice information for that purchase order.

You can also use this API to get details for any customer invoice (in the time range of seven days from a rolling window of the last six months, after the vendor went live on the API).

Business requirements

What kind of customer invoices are available to download?

The customer invoice is a PDF file which is encoded in binary64 string format. All purchase orders for the India region should have a customer invoice created which should be sent with the shipment.

Prerequisites

To complete this tutorial, you need:

- Authorization from the selling partner for whom you are making calls. For more information, refer to [Authorizing Selling Partner API applications](#).
- The [Direct-to-Consumer Shipping \(Restricted\)](#) role assigned to your developer profile.
- The [Direct-to-Consumer Shipping \(Restricted\)](#) role selected in the app registration page for your application.
