

Get a selling partner's replenishment business metrics 

[English](#)[Home](#)[Documentation](#)[API Reference](#)[Code Samples](#)[Announcements](#)[Models](#)[Release Notes](#)[FAQ](#)[GitHub](#)[Videos](#)

GET STARTED

[Welcome to SP-API Documentation](#)[What is the Selling Partner API?](#)[Selling Partner API Onboarding Overview](#)

Get a selling partner's replenishment business metrics

Learn how to use the Replenishment API to return a selling partner's replenishment program (currently Subscribe & Save) business metrics.

Learn how to use the Replenishment API to return a selling partner's replenishment program (currently Subscribe & Save) business metrics.

Prerequisites

To successfully complete this tutorial, you must have:

- Authorization from the selling partner for whom you are making calls. Refer to the [Authorizing Selling Partner API applications](#) for more information.

Selling Partner API Roles >

- The [Brand Analytics role](#) assigned to your developer profile.
- The Brand Analytics role selected in the app registration page for your application.
- The marketplace identifier for the marketplace for which to return data. Refer to [Marketplace IDs](#) to find the identifier for a marketplace. Refer to the [Replenishment API v2022-11-07 reference](#) for details about supported marketplaces.

Step 1. Get all performance metrics aggregated over the specified frequency

To return a selling partner's past performance metrics, call the `getSellingPartnerMetrics` operation.

Step 2. Get a specific performance

metric aggregated over the specified frequency

> You can request specific metrics instead of returning all available metrics by providing the optional `metrics` parameter.

To return a selling partner's past performance metrics, call the `getSellingPartnerMetrics` operation.

Step 3. Get forecast metrics data for the next 30, 60, or 90 days (applicable only for sellers)

> To return forecast metrics for the next 30, 60, or 90 days, call the `getSellingPartnerMetrics` operation.

When you call the `getSellingPartnerMetrics` operation you can choose to return forward-looking forecast metrics instead of past performance metrics. To request forecast metrics, specify `FORECAST` as

Delete an Application From Your Developer Account		the value for the <code>timePeriodType</code> parameter.
CALLING THE SP-API		
Configuration Details	>	Data is available for the next 30, 60 and 90 days. To return forecast data you must represent a 30, 60, or 90 day period in the requested date-time range values that you provide for the <code>timeInterval</code> parameter. If the <code>timeInterval</code> you provide does not have a duration that exactly matches 30, 60, or 90 days, it is rounded up to provide the next higher number of forecast days.

TUTORIALS

Tutorial: Subscribe to the ORDER_CHANGE Notification

Tutorial: Test Selling Partner API Endpoints

Tutorial: Automate your SP-API Calls Using a C# SDK

Tutorial: Automate your SP-API Calls Using a Java SDK

Tutorial: Automate your SP-API Calls Using a JavaScript SDK for Node.js

For example, if the duration of the interval is 91 days, the response contains forecast metrics for the next 30, 60, and 90 days. If the duration is 89 days, the response contains forecast metrics for the next 30, 60, and 90 days. If the interval duration is 59 days, the response contains forecast metrics for the next 30 and 60 days.

The `TOTAL_SUBSCRIPTIONS`, `_REVENUE` and `SHIPPED_SUBSCRIPTIO` `N_UNITS` metrics are the only forecast metrics supported.
