Get all Amazon Business orders

Learn how to get all Amazon Business orders.

Learn how to get all Amazon Business orders.

Prerequisites

To complete this tutorial, you need:

- Authorization from the selling partner for whom you are making calls. For more information, refer to [Authorizing Selling Partner API applications](#).
- At least one of the following roles assigned to your developer profile and selected in the app registration page:
 - The [Amazon Fulfillment](#) role.

CHANGELOG

- Service Provider Registration and Role Approval Process Overview
- Website Guidelines for Public Developers and Service Providers
- User Permissions for Service Providers
- Register your Application
- Update your Application Information
- Rotate your Application's LWA Credentials >
- View your Application Information and Credentials
- Learn How Sellers Authorize Service Providers
- Selling Partner API Roles >

- The [Buyer Communication](#) role.
- The [Buyer Solicitation](#) role.
- The [Finance and Accounting](#) role.
- The [Inventory and Order Tracking](#) role.
- The [Pricing](#) role.
- The [Product Listing](#) role.
- The [Professional Services \(Restricted\)](#) role.
- The [Selling Partner Insights](#) role.
- The [Direct to Consumer Shipping \(Restricted\)](#) role.
- The [Tax Invoicing \(Restricted\)](#) role.
- The [Tax Remittance \(Restricted\)](#) role.

To access Personally Identifiable Information (PII), you

[Policies and Agreements](#)[About Facial Data](#)**AUTHORIZATION**[Authorize Applications](#) >[Renew Authorizations](#)[Revoke Authorizations](#)[Authorization Limits](#)[Special Authorization Types](#) >**INTEGRATION**[Building Robust Amazon SP-API Applications](#)[SP-API SDKs](#) >

Get all Amazon Business orders

must have approval for the following roles:

- [Direct-to-Consumer Delivery \(Restricted\)](#) role is required to access shipping address information.
- The [Tax Remittance \(Restricted\)](#) role is required to access buyer information.
- The [Tax Invoicing \(Restricted\)](#) role is required to access buyer information.

You do not need a Restricted Data Token to access PII with the Orders API v2026-01-01.

Get all Amazon Business orders

Call the `searchOrders` operation and use the `includedData` parameter to specify the information you want the response to include. A successful response includes an `orders` array. An order is an Amazon Business order if the `programs` response attribute includes `AMAZON_BUSINESS`.

Tutorial: Test Selling Partner API Endpoints

Tutorial: Automate your SP-API Calls Using a C# SDK

Tutorial: Automate your SP-API Calls Using a Java SDK

Tutorial: Automate your SP-API Calls Using a JavaScript SDK for Node.js

Tutorial: Automate your SP-API Calls Using a Python SDK

Get all Amazon Business orders with delivery preferences

Call the `searchOrders` operation and use the `includedData` parameter with the `RECIPIENT` value.

A successful response includes an `orders` array. Delivery preferences are exclusive to Amazon Business orders, identifiable by the `AMAZON_BUSINESS` value in the `programs` response attribute. The delivery preferences for an Amazon Business order can be accessed through the `recipient.deliveryP` reference response attribute.

If the customer did not specify delivery preferences for the address, the `recipient.deliveryP` reference response attribute returns the default business hours for the region.

Get order details for an Amazon Business order

Call the `getOrder` operation ([Orders API](#))
