Get an order's regulated information

Learn how to get an order's regulated information.

Learn how to get an order's regulated information.

Prerequisites

To complete this tutorial, you need:

- Authorization from the selling partner for whom you are making calls. For more information, refer to [Authorizing Selling Partner API applications](#).
- The [Direct-to-Consumer Delivery \(Restricted\)](#) role assigned to your developer profile.
- The [Direct-to-Consumer Delivery \(Restricted\)](#) role selected in the app registration page for your application.

Step 1. Get a Restricted Data Token

To access regulated information, you must have a [Restricted Data Token \(RDT\)](#). To get this token:

1. Call the `createRestrictedDataToken` operation.
2. Save the `restrictedDataToken` value (which is the RDT). You'll need this in [Step 2](#).

Step 2. Get an order's regulated information

Revoke Authorizations

Authorization Limits

Get an order's regulated information

This is a restricted operation and requires a Restricted Data Token (RDT) for authorization. Some operations require restrictions because they contain customer PII data. These operations require passing an additional security review. For more information on RDT, refer to the [Tokens API](#) guide.

Call the `getOrderRegulatedInfo` operation. Specify the `orderId` of the order with the regulated information you want. Include the RDT in the `x-amz-access-token` header of your call.

A successful response includes information about the order, whether a dosage label is required, the verification status of the order, and the requested regulated information. Some types of regulated orders support additional details about the verification of the order. Information about the supported detail types and valid interim status codes is returned as part of this response.

Response example

This example is for a pending order:

JSON

```
{
  "payload": {
    "AmazonOrderId": "205-1725759-9209952",
    "RequiresDosageLabel": true,
    "RegulatedInformation": {
      "Fields": [
        {
          "FieldLabel": "Species",
          "FieldId": "petsSpecies",
          "FieldValue": "Cat",
          "FieldType": "Text"
        }, {
          "FieldLabel": "Pet name",
          "FieldId": "petsName",
          "FieldValue": "Snowy",
          "FieldType": "Text"
        }, {
          "FieldLabel": "Birth date",
          "FieldId": "petsDateOfBirth",
          "FieldValue": "15 August 2021",
          "FieldType": "Text"
        }, {
          "FieldLabel": "Weight",
```

>

```

    "pet": {
      "petId": 1,
      "name": "cat",
      "status": "available",
      "tags": [
        {
          "id": 1,
          "name": "cat"
        }
      ],
      "allergies": [
        {
          "id": 1,
          "name": "cat"
        }
      ]
    }
  }
}

```

This example is for an approved order:

SELLING PARTNER APPSTORE

What is the Selling Partner Appstore?

List Your App on the Selling Partner Appstore

This example is for a rejected order:

```
JSON
{
  "payload": {
    "AmazonOrderId": "205-1725759-9209952",
    "RequiresDosageLabel": true,
    "RegulatedInformation": {
      "Fields": [
        {
          "FieldLabel": "Species",
          "FieldId": "petsSpecies",
          "FieldValue": "Cat",
          "FieldType": "Text"
        }
      ]
    },
    "RegulatedOrderVerificationStatus": {
      "Status": "Rejected",
      "RequiresMerchantAction": false,
      "ExternalReviewerId": "externalId",
      "ReviewDate": "1970-01-19T03:59:27Z",
      "RejectionReason": {
        "RejectionReasonId": "shield_pom_vps_reject_species",
        "RejectionReasonDescription": "This medicine is not suitable for this pet's species"
      },
      "ValidRejectionReasons": []
    }
  }
}
```

This example is for a cancelled order:

```
JSON
{
  "payload": {
    "AmazonOrderId": "202-5156092-2672318",
    "RequiresDosageLabel": false,
    "RegulatedInformation": {
      "Fields": [
        {
          "FieldLabel": "Species",
          "FieldId": "petsSpecies",
          "FieldValue": "Dog",
          "FieldType": "Text"
        }, {
          "FieldLabel": "Birth date",
          "FieldId": "birthDate"
        }
      ]
    }
  }
}
```

```

This example is for an order that supports additional verification details and interim status updates:

The order in this example supports three additional detail types: `prescriptionDetail`, `RegulatedOrderVerificationStatus`, `approvedAlternativeDetails`, and `interimStatusDetail`. Each detail type is only valid `When the order is in the on`: `corresponding status indicated by` `ValidVerificationStatuses`. The response also includes `ValidInterimStatusCodes`, which lists the status codes you can use when providing an interim status update. For more information, refer to [Provide an interim status update for a regulated order](#).
