Get an order

Learn how to use the Vendor Direct Fulfillment Orders API to get an order.

Learn how to use the Vendor Direct Fulfillment Orders API to get an order. The `getOrder` operation returns information about the purchase order that you specify using the purchase order number. The response includes complete purchase order information for the purchase order, including line item details, quantity, and cost.

Use this API to get the details of specific orders returned by the `getOrders` operation. You can also use this API to get details for any purchase order in a seven-day time range during the past six months after the vendor went live on the API.

The following diagram shows the integration workflow to retrieve a specific purchase order:

Business requirements

- A packing slip is required for orders that are Business to Business (B2B) orders or gift orders. When `isPackingRequired` is `true`, a packing slip is required.

Get an order

- The `requiredShipDate` value is the latest date that the order must be shipped from the warehouse. The `promisedDeliveryDate` field value denotes the date we promised to deliver to the customer.
- You cannot submit changes to an order using the API. After an order has been placed, it cannot be changed.

Country-specific business requirements

Functionality	India	Europe	North America
Net cost	Conditional. Either net cost or list price.	Conditional. Either net cost or list price.	Conditional. Either net cost or list price.
List price	Conditional. Either net cost or list price.	Conditional. Either Net Cost or List price.	Conditional. Either net cost or list price.

★ Tip

To learn how to check that your vendor group contains all of the vendor codes that you want your application to access, and add new vendor codes to your account, refer to [Authorize your Application to Access Vendor Groups](#).

Prerequisites

To complete this tutorial, you need:

- Authorization from the selling partner for whom you are making calls. For more information, refer to [Authorizing Selling Partner API applications](#).
- The [Direct-to-Consumer Shipping \(Restricted\)](#) role assigned to your developer profile.
- The [Direct-to-Consumer Shipping \(Restricted\)](#) role selected in the app registration page for your application.

Get an order

📘 Note

This is a restricted operation and requires a Restricted Data Token (RDT) for authorization. Some operations require restrictions because they contain customer PII data. These operations require passing an additional security review. For more information on RDT, refer to the [Tokens API](#) guide.

To return information about a specific purchase order, call the `getOrder` operation.
