Welcome to SP-API Documentation

What is the Selling Partner API?

Selling Partner API Onboarding Overview >

Get Feedback Insights for a Browse Node

Retrieve customer feedback for a browse node.

This tutorial describes how to get feedback insights for a browse node. Browse node insights include the most positive and negative review and return topics for a browse node. Topics can be sorted by number of mentions and the effect on star rating they have. Month-on-month trends are also available. Review insights have customer snippets, while return insights have granular topic classifications.

Prerequisites

To complete this tutorial, you need:

- Authorization from the selling partner for whom you are

Selling Partner API Roles >

making calls. For more information, refer to [Authorize Applications](#).

- One of the following roles approved in your developer profile and selected in the App registration page for your application:
 - The [Selling Partner Insights role](#) if you are supporting a seller.
 - The [Brand Analytics role](#) if you are supporting a vendor.

Step 1. Retrieve the browse node of an item

Call

`getItemBrowseNode`

to retrieve the ID of the browse node to which an ASIN belongs. The response contains the `browseNodeId` that you use in the requests to the operations in the following steps.

Step 2. Retrieve browse node review topics

[Policies and Agreements](#)[About Facial Data](#)**AUTHORIZATION**[Authorize Applications](#)[Renew Authorizations](#)[Revoke Authorizations](#)[Authorization Limits](#)[Special Authorization Types](#)**INTEGRATION**[Building Robust Amazon SP-API Applications](#)[SP-API SDKs](#)

>

>

>

Call[getBrowseNodeReview](#)[Topics](#) twice, oncewith `sortBy` set to`MENTIONS` , and againwith `sortBy` set to`STAR_RATING_IMPACT` .

This retrieves both the most-mentioned topics, and the topics that affect the star rating the most.

Step 3. Retrieve browse node review trends

Call[getBrowseNodeReview](#)[Trends](#) .

Step 4. Retrieve browse node return topics

Call[getBrowseNodeReturn](#)[Topics](#) twice, oncewith `sortBy` set to`MENTIONS` , and againwith `sortBy` set to`STAR_RATING_IMPACT` .

This retrieves both the most-mentioned topics, and the topics that affect the star rating the most.

Step 5. Retrieve browse node return trends

Delete an Application From Your Developer Account

CALLING THE SP-API

Configuration Details >

Call Structure >

Development Tools >

Performance Management >

Call
`getBrowseNodeReturnTrends` . The response includes the occurrence percentage trends over the past six months.
