What is the Selling Partner API?

Selling Partner API Onboarding Overview

Get packing slips

Learn how to use the Vendor Direct Fulfillment Shipping API to get a list of packing slips for purchase orders.

Learn how to use the Vendor Direct Fulfillment Shipping API to get a list of packing slips for purchase orders. The `getPackingSlips` operation returns a list of packing slips for the orders which meet the criteria specified. If you need to get a packing slip for a specific order, use the `getPackingSlip` operation instead.

A packing slip is required only if it is for a Business-to-Business (B2B) order or a gift order. When the value of the `isPslipRequired` field is true, a packing slip is required for the order.

Learn How Sellers Authorize Service Providers

Selling Partner API Roles >

You should use this API to get packing slips for the purchase orders available to you for fulfillment. Amazon recommends that vendors check for orders at least once per hour during business hours. Depending on your business volume, you can choose to check more frequently. You can get up to 100 packing slips in one API call. If there are more than 100 packing slips, you can use the `nextToken` value as a parameter in your next request to get the next set of packing slips.

The following diagram shows the integration workflow when retrieving packing slips:

**Prerequisites**

To complete this tutorial, you need:

- Authorization from the selling partner for whom you are making calls. For more information, refer to [Authorizing Selling](#)

[Policies and Agreements](#)[About Facial Data](#)

AUTHORIZATION

[Authorize Applications](#) >[Renew Authorizations](#)[Revoke Authorizations](#)[Authorization Limits](#)[Special Authorization Types](#) >[Partner API applications.](#)

- The [Direct-to-Consumer Shipping \(Restricted\)](#) role assigned to your developer profile.
- The [Direct-to-Consumer Shipping \(Restricted\)](#) role selected in the app registration page for your application.

INTEGRATION

[Building Robust Amazon SP-API Applications](#) >[SP-API SDKs](#)

Note

This is a restricted operation and requires a Restricted Data Token (RDT) for authorization . Some operations require restrictions because they contain customer PII data. These operations require passing an additional security review. For more information
