CHANGELOG

Get recipient details for attended deliveries

Learn how to get recipient details for attended deliveries where someone other than the buyer received the package.

Learn how to get the recipient details for packages delivered to specific individuals other than the intended recipient.

Prerequisites

To complete this tutorial, you need:

- Authorization from the selling partner for whom you are making calls. For more information, refer to [Authorizing Selling Partner API Applications](#).
- The [Amazon Fulfillment role](#) assigned to your developer profile.
- The [Amazon Fulfillment role](#) selected in the App registration page for your application.

Retrieve recipient details for attended deliveries

Call the `getFulfillmentOrder` operation. In the response:

1. Locate the shipment in the `fulfillmentShipments` array.
2. Locate the package in the `fulfillmentShipmentPackage` array.

[SP-API Release Notes](#)[SP-API Deprecation Schedule](#)[SP-API Product Metadata Updates](#)**DIRECTORIES**[SP-API Models](#)[SP-API Seller Use Cases](#)[SP-API Vendor Use Cases](#)[Seller Central URLs](#)[Vendor Central URLs](#)**REGISTRATION**[SP-API Registration Overview](#)[Developer Registration Request Status](#)[Third-Party Provider Registration](#)[Service Provider Registration and Role Approval Process Overview](#)[Website Guidelines for Public Developers and Service Providers](#)[User Permissions for Service Providers](#)[Register your Application](#)[Update your Application Information](#)[Rotate your Application's LWA Credentials](#)[View your Application Information and Credentials](#)[Learn How Sellers Authorize Service Providers](#)[Selling Partner API Roles](#)[Policies and Agreements](#)[About Facial Data](#)**AUTHORIZATION**[Authorize Applications](#)[Get recipient details for attended deliveries](#)**3. Check the**

`deliveryInformation.dropOffLocation` object. This object contains two properties: `type` (string) and `attributes` (object). The `type` indicates where the package was delivered, and the `attributes` property provides recipient details based on delivery type.

Drop point types and associated fields

- FALLBACK_NEIGHBOR_DELIVERY**
 - `neighborName`: Name of the neighbor who received the package
 - `neighborDoorNumber`: Door or unit number of the neighbor
- RECEPTIONIST**
 - `recipientName`: Name of the receptionist who received the package
