Handle Easy Ship Cross-Border Orders

Learn how to handle Easy Ship cross-border orders.

Learn how to handle
Easy Ship cross-border
orders.

Prerequisites

To complete this
tutorial, you need:

- Authorization from the selling partner for whom you are making calls. For more information, refer to [Authorizing Selling Partner API applications](#).
- The shipment ID of the shipment you want to process.
- Approval for the [Direct-to-Consumer Shipping \(Restricted\) role](#) in your developer profile.

Selling Partner API Roles >

- The Direct-to-Consumer Shipping (Restricted) role selected in the App registration page for your application.

Step 1. Identify cross-border requirements

Call the

`getShipments` or
`getShipment`

operation. Examine the following attributes in the response:

- `countryOfOrigin`
Requirement : If `REQUIRED`, the shipment is cross-border.
- `itemValueRequirement` : If `REQUIRED`, you must declare the value of items.
- `recommendedCurrencyCode` : The currency to use for the item value provided with the `createPackage` operation.
- `recommendedCountryOfOrigin` : The country of origin to use with the `createPackage` operation.

These values must be provided for cross-border orders.

Step 2. Process the shipment

Follow the [Process a Shipment](#) tutorial to process the shipment. In Step 2 of that tutorial, call

`createPackages` with the cross-border information you retrieved in Step 1 of this tutorial. Use the `recommendedCountryOfOrigin` value from `getShipment` or `getShipments` as the `countryOfOrigin` value in your call to `createPackages`.

Similarly, use the `recommendedCurrencyCode` value as the `currency` value.
