Include additional seller input data

Learn how to use the Merchant Fulfillment API to include additional seller input data.

Learn how to use the Merchant Fulfillment API to include additional seller input data. The `getAdditionalSellerInputs` operation returns a list of additional inputs that are required from the seller to purchase shipping for some shipping services. It is only required for shipment services that require additional seller inputs.

Prerequisites

To complete this tutorial, you need:

- Authorization from the selling partner for whom you are making calls. For more information,

Learn How Sellers Authorize Service Providers

Selling Partner API Roles >

refer to [Authorizing Selling Partner API applications](#).

- The [Direct-to-Consumer Shipping \(Restricted\)](#) role assigned to your developer profile.
- The [Direct-to-Consumer Shipping \(Restricted\)](#) role selected in the app registration page for your application.

Step 1. Determine if the shipment service requires additional seller inputs

1. Call the [getEligibleShipmentServices](#) operation.
2. Retrieve the list of `ShippingServices` returned by the operation.
3. Check for the `RequiresAdditionalSellerInputs` attribute.
4. If `RequiresAdditionalSellerInputs` is `true`, it means the shipment

service requires
additional seller
inputs.

Step 2. Call the `getAdditionalSellerInputs` operation

If the shipment service requires additional seller inputs, call the `getAdditionalSellerInputs` operation and include all required parameters. The response includes a list of required parameters that a seller must include if they want to purchase shipping services.

Step 3. Review the additional seller inputs required

1. Examine the response from the `getAdditionalSellerInputs` operation.
2. Identify the specific additional seller inputs that are required.

Step 4. Provide the required seller inputs

Delete an Application From Your Developer Account

CALLING THE SP-API

Configuration Details >

Call Structure >

Development Tools >

Performance Management >

1. Collect the necessary information based on the additional seller inputs identified in the response.
2. Ensure the information provided meets the syntax requirements specified in the response.
3. Prepare the required seller inputs for the next step.

Step 5. Create the shipment

Include additional seller input data

review. For more information on RDT, refer to the [Tokens API](#) guide.

1. If the required seller inputs are collected and prepared, call the [createShipment](#) operation.
2. Use the necessary parameters and seller inputs with the [createShipment](#) operation.
3. Follow the appropriate syntax requirements for the seller inputs in the [getAdditionalSellerInputs](#) response.

Step 6: (Optional) Retrieve saved values

The [getAdditionalSellerInputs](#) operation returns saved values previously provided to Amazon. To access these saved values, examine the response from the [getAdditionalSellerInputs](#) operation.
