Report output type:
Tab-delimited flat file

Provides all the information required to generate a VAT invoice for each shipment, return, or refund for a seller's order. A shipment is included in this report immediately after it is dispatched. Amazon recommends scheduling this report at least twice a day.

This report accepts the following `reportOptions` values:

- `pendingInvoices` – A Boolean value. When `true`, the report contains only shipments for which invoices and credit notes are pending. This report does not contain shipments for which invoices have already been uploaded successfully. Includes shipments for orders that were placed within
