Listings Management Workflow Migration

Migrate listings management workflows from XML-based and flat file feeds to Selling Partner Listings Items API and JSON-based feeds.

! Important

Starting **July 31, 2025**, the Feeds API no longer supports legacy XML and flat file listing feeds, including pricing, inventory, relationships, and images. Developers will receive fatal `processingStatus` in the `getFeed` API response for these feeds. For more information, refer to the [deprecation announcement](#).

This guide explains how to migrate listings management workflows from XML and flat file listings submissions to the `Listings Items` API and `JSON_LISTINGS_FEED`. This is necessary to prepare for the deprecation of legacy feed types.

Review the [Building Listing Management Workflows Guide](#) prior to this migration guide.

Benefits

The guidance offered here describes the following benefits for both sellers and vendors:

- Full data requirements in product schemas
- Availability of pre-submission validation rules
- Sync and async feedback mechanisms
- Up-to-date product type data requirements that ensure you are using the latest version, unlike XMLs
- Uniformity in schemas across data requirements, unlike XML in the past that led to errors for developers uploading multiple categories
- Reducing the effort required to map flat file or XML attributes to Listings APIs and the `JSON_LISTINGS_FEED`
- Reducing human/manual input errors leading to submission errors and abandoned selections

- Easier management of large catalogs and sending of full selections with no upload constraints

API versions

This guide references operations in the following Selling Partner API sections. For more detailed information about building workflows using these sections, refer to the [Building Listings Management Workflows Guide](#). For more detailed information about the individual API sections, follow the referenced links.

API Reference	API Version	Use Case Guide
Feeds API	2021-06-30	Feeds API Use Case Guide
Listings Items API	2021-08-01	Listings Items API Use Case Guide
Listings Restrictions API	2021-08-01	Listings Restrictions API Use Case Guide
Notifications API	v1	Notifications API Use Case Guide
Product Type Definitions API	2020-09-01	Product Type Definitions API Use Case Guide

Feed types

This guide references the following feed types used with the [Feeds API](#). For more detailed information about feed types, refer to [Listings Feed Type Values](#).

!

Important

Feeds API support for XML and flat file product listings feeds is deprecated. For more information about the affected feeds and migration guidelines, refer to the [deprecation announcement](#).

Feed Type	Format	Schema	Listings Data Type	Supported Selling Partners	Description
JSON_LISTINGS_FEED	JSON	Listings Feeds Schema	All	Sellers and vendors.	Structured (JSON) feed type for all listings data compatible and interchangeable with the Listings Items API.
