What is the Selling Partner API?

Selling Partner API Onboarding Overview >

Terminology

Frequently Asked Questions >

Manage A+ content

Learn how to manage A+ content.

Prerequisites

To complete this tutorial, you need:

- Authorization from the selling partner for whom you are making calls. Refer to [Authorizing Selling Partner API applications](#) for more information.
- The [Product Listing](#) role assigned to your developer profile.
- The [Product Listing](#) role selected in the app registration page for your application.
- One or more ASINs to which you would like to publish content.
- Content that you want to publish.

CHANGELOG

[SP-API Release Notes](#)[SP-API Deprecation Schedule](#)[SP-API Product Metadata Updates](#)

DIRECTORIES

[SP-API Models](#)[SP-API Seller Use Cases](#)[SP-API Vendor Use Cases](#)[Seller Central URLs](#)[Vendor Central URLs](#)

REGISTRATION

[SP-API Registration Overview](#) >[Developer Registration Request Status](#)[Third-Party Provider Registration](#) >[Service Provider Registration and Role Approval Process Overview](#)[Website Guidelines for Public Developers and Service Providers](#)[User Permissions for Service Providers](#)[Register your Application](#)[Update your Application Information](#)[Rotate your Application's LWA Credentials](#) >[View your Application Information and Credentials](#)[Learn How Sellers Authorize Service Providers](#)[Selling Partner API Roles](#) >

Step 1. Suspend a content document from all applied ASINs

Call the

`postContentDocumentSuspendSubmission`

operation.

Note

When you publish a content document to an ASIN that already has content published to it, Amazon suspends the existing content from the ASIN.

This suspension also occurs when you remove an ASIN from a content document. You don't need the

`postContentDocumentSuspendSubmission`

operation in either scenario.

[Policies and Agreements](#)[About Facial Data](#)

AUTHORIZATION

[Authorize Applications](#)[Renew Authorizations](#)[Revoke Authorizations](#)[Authorization Limits](#)[Special Authorization Types](#)

INTEGRATION

[Building Robust Amazon SP-API Applications](#)[SP-API SDKs](#)

Step 2. Get published content

To get content that is already published by the selling partner, call the

`getContentDocument`

operation. Set

`includedDataSet`

equal to `METADATA` to get content metadata.

Set `includedDataSet`

equal to `CONTENTS` to

get content documents.

Step 3. Update a content document

Call the

`updateContentDocument` operation.

Step 4. Get the ASINs that are related to a content document

Call the

`listContentDocumentAsinRelations`

operation.

Step 5. Add or remove ASINs from a content document

Delete an Application From Your Developer Account

TUTORIALS

Tutorial: Subscribe to the ORDER_CHANGE Notification

Tutorial: Test Selling Partner API Endpoints

Tutorial: Automate your SP-API Calls Using a C# SDK

Tutorial: Automate your SP-API Calls Using a Java SDK

Tutorial: Automate your SP-API Calls Using a JavaScript SDK for Node.js

Tutorial: Automate your SP-API Calls Using a Python SDK

Call the `postContentDocumentAsinRelations` operation.

Important

The ASINs that you post replace all ASINs related to a content document, which can result in additional or removed ASINs. Removing the ASIN can suspend the content document from the ASIN. Post the entire set of ASINs related to a content document.
