Manage transfer schedules for a Seller Waller account

Learn how to list, create, update, and delete transfer schedules for a Seller Wallet account.

Learn how to retrieve all transfer schedules for a Seller Wallet account, and create, update, or delete transfer schedules.

Prerequisites

To complete this tutorial, you must have:

- Authorization from the selling partner for whom you are making calls. Refer to the [Authorizing Selling Partner API applications](#) for more information.
- The [Account Information Service Provider role](#) assigned to your developer

profile and selected in the App Registration page for your application.

- The [Payment Initiation Service Provider role](#) assigned to your developer profile and selected in the App Registration page for your application.

Step 1. Retrieve a list of Seller Wallet accounts

Retrieve all Seller Wallet accounts that belong to the seller by calling the [listAccounts](#) operation. Locate the `accountId` value of the account you want to examine. You use the `accountId` value to retrieve transfer schedules in Step 2 and to create a transfer schedule in Step 4.

Step 2. Retrieve a list of transfer schedules

Retrieve up to 100 transfer schedules at a time for a given Seller Wallet by calling the [listTransferSchedules](#)

[es](#) operation with the `accountId` value you retrieved in the previous step. If there are more schedules available, you can retrieve them with the provided `nextPageToken` .

The following steps use the

`transferScheduleId` of a schedule to retrieve more information about the transfer schedule, update the transfer schedule, and delete the transfer schedule.

Step 3. Retrieve detailed transfer schedule information

Call the [getTransferSchedule](#) operation for transfer schedule details.

Step 4. Create a new transfer schedule

Create a transfer schedule request from a Seller Wallet account to another customer-provided account by calling the [createTransferSchedule](#)

ule operation. Use the accountId value from step 1 as the sourceAccountId value in the body of the request.

Caution

The bankAccountNumber value in the body of the request is encrypted before Amazon receives it, so should not be used to generate destAccountDigitalSignature, and should not be included in the request signature.

Step 5. Update an existing transfer schedule

Call the [updateTransferSchedule](#) operation. You can update the transfer schedule information, payment preference, or transfer schedule status.
