What is the Selling Partner API?

Selling Partner API Onboarding Overview >

Manipulate shipping labels

Learn how to use the Merchant Fulfillment API to manipulate shipping labels.

Learn how to use the Merchant Fulfillment API to manipulate shipping labels. The `createShipment` and `getShipment` operations return a shipping label file in PDF, PNG, or ZPL format, depending on the carrier. Amazon compresses the document data before it returns it as a Base64-encoded string.

Prerequisites

To complete this tutorial, you need:

- Authorization from the selling partner for whom you are making calls. For more information, refer to [Authorizing Selling Partner API applications](#).

more information on RDT, refer to the [Tokens API](#) guide.

1. Decode the Base64-encoded string.
2. Save the decoded string with a `.gzip` extension.
3. Extract the PDF, PNG, or ZPL file from the GZIP file.

`createShipment` and `getShipment` also return a Base64-encoded MD5 hash to validate the document data.

Reprint a shipping label

Note

This is a restricted operation and requires a Restricted Data Token (RDT) for authorization. Some operations require restrictions because they contain customer PII data. These operations
