Merchant Fulfillment API

Learn how to use the Merchant Fulfillment API.

You use the Merchant Fulfillment API to build applications for sellers to use Amazon Buy Shipping services to purchase shipping for non-Prime and Prime orders.

Note

For new integrations, use the [Shipping API v2](#) instead.

Current version	Legacy versions	Availability	Sandbox
v0 (Reference Model)	None	Sellers only	Static

► [Release notes](#)

To learn more about the terms that are used in this guide, refer to [Terminology](#).

Use cases

The following use case examples are available for the Merchant Fulfillment API v0:

- [Fulfill seller-fulfilled Prime and non-Prime orders](#): Identify Prime and non-Prime orders and create shipments.
- [Cancel a shipment](#): Use the `cancelShipment` operation.
- [Manipulate shipping labels](#): Extract document data from a compressed file and reprint a shipping label.

Error codes

The following table describes the Merchant Fulfillment error codes.

Error code	HTTP status code	Description
InsufficientFunds	400	The requested shipping label purchase was rejected because of insufficient funds in the seller's account.
InvalidRequest	400	Request has missing or invalid parameters and cannot be parsed.
InvalidShipFromAddress	400	The specified <code>ShipFromAddress</code> value is invalid. Specify a valid address.
InvalidShippingServiceOfferId	400	The specified <code>ShippingServiceOfferId</code> value is invalid. Specify a <code>ShippingServiceOfferId</code> value returned by a previous call to the getEligibleShipmentServices operation.
LabelCancellationWindowExpired	400	The cancellation window for requesting a label refund has expired. Cancellation policies vary by carrier. For more information about carrier cancellation policies, refer to the Seller Central Help Hub for your marketplace .
LabelFormatNotSupported	400	The requested <code>LabelFormat</code> does not match the available formats.
ShipmentAlreadyExists	400	One or more items specified in a call to the createShipment operation have already shipped. Specify only unshipped items. A <code>ShipmentId</code> is returned in the <code>Message</code> element of the error message for each specified

SELLING PARTNER APPSTORE

What is the Selling Partner Appstore?

List Your App on the Selling Partner Appstore

Error code	HTTP status code	Description
		item that has already shipped.
ShipmentRequestDetailsTooRestrictive	400	The specified ShipmentRequestDetails and ShippingServiceId values are so restrictive that no shipping service offer is available that can fulfill the request. Try calling the createShipment operation again with less restrictive values, or first call the getEligibleShipmentServices operation to check if there are any shipping service offers available that match the ShipmentRequestDetails and ShippingServiceId values that you specify.
ShippingServiceOfferNotAvailable	400	The specified ShippingServiceOfferId value is no longer valid. This could be because the shipping rate changed since you received the ShippingServiceOfferId value with a previous call to the getEligibleShipmentServices operation. Call the getEligibleShipmentServices operation again to get a new ShippingServiceOfferId value.
InvalidState	404	The request cannot be applied to the shipment in its current state. For example, a shipment in the RefundApplied state cannot be canceled.
ItemsNotInOrder	404	Items specified in a call to the createShipment operation are not part of the order specified in the same call.
RegionNotSupported	404	The specified order is from a marketplace where the Merchant Fulfillment service is not supported.
ResourceNot	404	The specified resource (such as ShipmentId or AmazonOr
