Frequently Asked Questions >

Order Reports

Order Reports for the Selling Partner Reports API.

 Note

Order reports are retained for 30 days. If you don't download the reports before they expire, you can generate them again.

There are three categories of order reports:

- [Order](#)
- [Order tracking](#)
- [Pending order](#)

Order reports

The date range you specify for an order report indicates when orders become eligible for fulfillment (no

longer in a pending state), not when you create them. Order reports only support orders that are less than two years old.

The reports are canceled if no eligible data is found.

**Note**

Order reports support orders from 2016 onward for the JP, AU, and SG marketplaces.

Order reports can have up to a 30-minute delay, as the fulfillable date of an order is usually 30 minutes after the order has been created.

Unshipped Orders Report

**Note**

This is a restricted report type. When you specify a restricted report type in a call to the `getReportDocument`

Order tracking reports

The Order tracking reports are available in all regions and for all sellers. The reports return all orders, regardless of fulfillment channel or shipment status. The reports are intended for order tracking, not to drive a seller's fulfillment process, as they do not include customer-identifying information and scheduling is not supported. Also note that for self-fulfilled orders, item price is not shown for orders in a pending state.

The date range for these reports is limited to 30 days. However, you can select any start date.
