Welcome to SP-API Documentation

What is the Selling Partner API?

Selling Partner API Onboarding Overview

Orders API

Orders API

Learn how to use the Orders API.

You use the Orders API to retrieve order information. You can develop custom applications that facilitate order synchronization and order research.

🔗

Version migration

The Orders API v0 is deprecated. Learn how to migrate to the [Orders API v2026-01-01](#) in the [Orders API Migration Guide](#).

Current version	Legacy versions	Availability	Sandbox
v2026-01-01 (Reference Model)	v0	Sellers only	Static

▶

[Release notes](#)

To learn more about the terms that are used in this guide, refer to [Terminology](#).

📖

Note

Orders more than two years old don't show in the API response, except for the SG, JP, and AU marketplaces, which support orders from 2016 onwards.

Use cases

The following use case examples are available for the Orders API:

- [Access Orders PII](#): Learn how to access Personally Identifiable Information with the Orders API.

Orders API

- [Get orders with filtering criteria](#): The `searchOrders` operation of the Orders API returns orders created or updated during the time frame or other filtering criteria indicated by parameters you specify.
- [Get order information](#): The `getOrder` operation of the Orders API returns order information that you specify.
- [Confirm the shipment status](#): The `confirmShipment` operation of the Orders API confirms the shipment status for a specified order. You can also use this operation to edit shipment details of orders that have been shipped.
- [Review if an order contains regulated information](#): Get the status and regulated information for an order.
- [Recognize which orders contain regulated information](#): After you identify a regulated order, get additional status and regulated information.
- [Get an order's regulated information](#): Get regulated information for an order.
- [Approve or reject a regulated order](#): Approve or reject an order that contains regulated information.
- [Provide additional verification details about a regulated order](#): Provide additional details about the verification of an order that contains regulated information.
- [Get all Amazon Business orders](#): Get orders for a selling partner and identify Amazon Business orders.
