Provide additional verification details about a regulated order

Learn how to provide additional verification details about a regulated order.

Learn how to provide additional verification details about a regulated order.

Prerequisites

To complete this tutorial, you need:

- Authorization from the selling partner for whom you are making calls. For more information, refer to [Authorizing Selling Partner API applications](#).
- The [Direct-to-Consumer Delivery \(Restricted\)](#) role assigned to your developer profile.
- The [Direct-to-Consumer Delivery \(Restricted\)](#) role selected in the app registration page for your application.

Step 1. Check if an order supports verification details and is in a valid status

Note

This is a restricted operation and requires a Restricted Data Token (RDT) for authorization. Some operations require restrictions because they contain customer PII data. These operations require passing an additional security

review. For more information on RDT, refer to the [Tokens API](#) guide.

Call the `getOrderRegulatedInfo` operation. If the order supports verification details, the `ValidVerificationDetails` array appears in the response and displays the following:

- `VerificationDetailType` : The detail type for the order.
- `ValidVerificationStatuses` : The order statuses in which you can provide this detail type.

Response example

In this example, the order supports three verification detail types:

`prescriptionDetail`,
`approvedAlternativeDetails`, and
`interimStatusDetail` :

JSON

```
{
  "payload": {
    "AmazonOrderId": "902-2592119-3531015",
    "RequiresDosageLabel": false,
    "RegulatedInformation": {
      "Fields": [
        {
          "FieldId": "pets_rx_scName",
          "FieldLabel": "Pet name",
          "FieldType": "Text",
          "FieldValue": "Woofer"
        }
      ]
    },
    "RegulatedOrderVerificationStatus": {
      "Status": "Pending",
      "RequiresMerchantAction": true,
      "ValidRejectionReasons": [
        {
          "RejectionReasonId": "pets_rx_sc_incorrect_product",
          "RejectionReasonDescription": "Canceled order due to veterinarian indicating wrong product ordered"
        }
      ],
      "ValidVerificationDetails": [
        {
```

Special Authorization Types	>
INTEGRATION	
Building Robust Amazon SP-API Applications	
SP-API SDKs	>

```
      "VerificationDetailType":
      "prescriptionDetail",

      "ValidVerificationStatuses": [
        "Approved"
      ],
    },
    {
      "VerificationDetailType":
      "approvedAlternativeDetails",

      "ValidVerificationStatuses": [
        "Rejected"
      ],
    },
    {
      "VerificationDetailType":
      "interimStatusDetail",

      "ValidVerificationStatuses": [
        "Pending"
      ],
    }
  ],
}
```

In the preceding example, you can include a verification detail in your call when the order is in the corresponding status:

- `prescriptionDetail` — The order `Status` must be `Approved`.
- `approvedAlternativeDetails` — The order `Status` must be `Rejected`.
- `interimStatusDetail` — The order `Status` must be `Pending`.

If you provide a verification detail when the order is not in the required status, the call returns an `InvalidInput` error.

CALLING THE SP-API	
Configuration Details	>

Step 2. Update the verification details for a regulated order

Call the `updateVerificationStatus` operation.

Request example: `prescriptionDetail`

This example provides prescription details for an approved order:

Call Structure	>
Development Tools	>
Performance Management	>

```
JSON
PATCH https://sellingpartnerapi-eu.amazon.com/orders/v0/orders/205-1725759-9209952/regulatedInfo
{
  "regulatedOrderVerificationStatus":
  {
    "externalReviewerId":
    "reviewer1234",
  }
}
```

SELLING PARTNER APPSTORE

- What is the Selling Partner Appstore?
- List Your App on the Selling Partner Appstore

```
"verificationDetails": {
  "prescriptionDetail": {
    {
      "prescriptionId": "Rx-1234",
      "expirationDate": "2024-01-01T00:00:00Z",
      "writtenQuantity": 2,
      "totalRefillsAuthorized": 10,
      "usageInstructions": "Take one per day by mouth with food",
      "refillsRemaining": 10,
      "clinicId": "ABC-1234"
    }
  }
}
```

This example provides prescription details and updates the status to `Approved` in the same call (Amazon applies the status update first):

JSON

```
PATCH https://sellingpartnerapi-eu.amazon.com/orders/v0/orders/205-1725759-9209952/regulatedInfo
{
  "regulatedOrderVerificationStatus": {
    {
      "status": "Approved",
      "externalReviewerId": "reviewer1234",
      "verificationDetails": {
        "prescriptionDetail": {
          {
            "prescriptionId": "Rx-1234",
            "expirationDate": "2024-01-01T00:00:00Z",
            "writtenQuantity": 2,
            "totalRefillsAuthorized": 10,
            "usageInstructions": "Take one per day by mouth with food",
            "refillsRemaining": 10,
            "clinicId": "ABC-1234"
          }
        }
      }
    }
  }
}
```

Request example:
`approvedAlternativeDetails`

This example rejects an order and suggests an alternative product:

JSON

```
PATCH https://sellingpartnerapi-eu.amazon.com/orders/v0/orders/902-2592119-3531015/regulatedInfo
{
  "regulatedOrderVerificationStatus":
  {
    "status": "Rejected",
    "externalReviewerId":
    "vet_clinic_12345",
    "rejectionReasonId":
    "pets_rx_sc_incorrect_product",
    "verificationDetails": {
      "approvedAlternativeDetails":
      [
        {
          "attributeName": "asin",
          "originalValue":
          "B00DOGMEDICINE",
          "approvedValue":
          "B00CATMEDICINE"
        }
      ]
    }
  }
}
```

Request example:
interimStatusDetail

This example provides an interim status update for a pending vet-regulated order.

JSON

```
PATCH https://sellingpartnerapi-eu.amazon.com/orders/v0/orders/902-2592119-3531015/regulatedInfo
{
  "regulatedOrderVerificationStatus":
  {
    "status": "Pending",
    "externalReviewerId":
    "vetsource_system",
    "verificationDetails": {
      "interimStatusDetail": {
        "statusCode":
        "vet_contacted_email",
        "statusDateTime": "2026-02-26T10:00:00Z"
      }
    }
  }
}
```

Best Practices

List of verificationDetails that Amazon supports

prescriptionDetail

prescriptionDetail contains prescription information from the customer's clinic for US regulated products. This detail type is only valid when the order status is Approved .

approvedAlternativeDetails

approvedAlternativeDetails contains one or more suggested alternative product attributes when a reviewer rejects an order. Each entry includes the attribute name, the original value, and the approved alternative value. This detail type is only valid when the order status is Rejected .

interimStatusDetail

interimStatusDetail contains a status code and timestamp indicating progress on a vet-regulated order while it is still under review. Valid status codes are returned in the ValidInterimStatusCodes field of the getOrderRegulatedInfo response. This detail type is only valid when the order status is Pending . For more information, refer to [Provide an interim status update for a regulated order](#).
