Register as a Private SP-API Vendor

GET STARTED

Welcome to SP-API Documentation

What is the Selling Partner API?

Selling Partner API Onboarding Overview

Register as a Private SP-API Vendor

Complete the SP-API Developer Profile as a private vendor.

This topic provides a registration overview for SP-API **private vendor** applications.

Private vendor applications:

Private vendor applications are available only to your organization and are self-authorized. An example use case is creating an application through in-house IT resources, or a third-party IT company or agency creating an app for you.

! Important

Private vendor developers can authorize other vendor groups if

Selling Partner API Roles >

they have admin permissions on both accounts, up to a maximum number. For more information, refer to [Application authorization limits](#) and [Using Multiple Vendor Groups](#). If a private vendor developer exceeds their authorization limits, then they must either remove an existing self-authorization or contact [Vendor Central Support](#) to increase your quota.

Before you register, review the [Registration recommendations](#) in the SP-API Registration overview topic.

For more information about developer types, refer to [Terminology](#), or watch the [Getting Started videos](#).

Register as a private vendor developer

Complete the private vendor developer profile

The Developer Profile collects your organization's contact information, information about the data you require in Amazon Services APIs, and security and use information to ensure your compliance with Amazon's Acceptable Use Policy, Data Protection Policy, Solution Provider Agreement, and access requirements.

After you complete the Developer Profile, Amazon will evaluate your information and create a case with next steps. You might be asked to provide additional information or documentation, so you must complete all fields truthfully and accurately.

Use the following steps to complete the Developer Profile.

1. Go to Vendor Central for your marketplace. Refer to [Vendor Central URLs](#) for a list of

Delete an Application From Your Developer Account

URLs by
marketplace.

3. From the **Integration** menu, choose **API Integration**.

4. If you have not yet completed a Developer Profile for your selling account, choose **Proceed to Developer Profile**. Otherwise, choose **View profile**.

5. Complete the developer registration form.

1. Enter your **Contact Information**.

2. Enter **Data Access** details.

1. From the **Data Access** dropdown, choose **Private Developer**: I build application(s) that integrate my own company with Amazon Services APIs.

VAT Calculation Service >

3. Select the **Roles** that apply to your organization. For more information about Role definitions, refer to [Roles in the Selling Partner API](#).

Amazon Seller Data Access >
Best Practices

 Note

Vendors using Direct Fulfillment need additional restricted roles. Restricted roles contain personally identifiable

The decision to grant or deny SP-API access is made based on the information that you provide in your Developer Profile, including but not limited to your application functionality and your compliance with the Acceptable Use Policy and the Data Protection Policy. We cannot provide detailed information about how we determine SP-API eligibility, but we prioritize data security in these decisions.

If you close or do not respond to questions about your case **within five days**, your case will be resolved and your SP-API access will remain unchanged.
