Regulatory Compliance Reports

information, page view (glance view), and order data for customers that elect to share this data with specific sellers.

The customer data is accessible across various reporting periods (DAY , WEEK , and MONTH).

Developers can choose start and end dates and the reporting period for data retrieval and aggregation. If the customer does not elect to share their data, the report does not generate data.

Note: Report generation may require up to an hour due to the extensive data processing involved.

This report accepts the following

`reportOptions` value:

- `reportPeriod` - Specifies the reporting period for the report. Values include DAY , WEEK , and MONTH . Example:

```
"reportOptions":
{
  "reportPeriod":
    "WEEK"
}
```

FBA Bulk Invoice

reportType value:

`FBA_BULK_INVOICE`

Role: [Tax Invoicing \(Restricted\)](#)

About Facial Data

AUTHORIZATION

Authorize Applications

>

Availability: Sellers**Requested/scheduled:**

This report can only be requested.

Provides the invoices for a seller within a given date range. These invoices include customer orders served by the seller.

This report type supports the following report options:

Renew Authorizations

Revoke Authorizations

Authorization Limits

Special Authorization Types

>

INTEGRATION

Building Robust Amazon SP-API Applications

SP-API SDKs

>

- `orderIds` : A single string consisting of a comma separated list of order ids to filter. Example: `406-8193317-8698708 , 408-0804227-3381000` .
- `shipmentIds` : A single string consisting of a comma separated list of shipment ids to filter. Example: `64119752218302 , 264552989124123` .
- `transactionTypes` : A single string consisting of a comma separated list of transaction types to filter. The possible `transactionTypes` are `SHIPMENT` , `REFUND` , `CANCEL` , `EINVOICE_CANCEL` , `FC_TRANSFER` ,

are given the request will fail.

If none of the fields are set or the report options field itself is absent, then the request will return all the relevant invoices (SHIPMENT and MCF_SHIPMENT transaction types) in the requested date range.

Marketplace ASIN Page View Metrics

reportType value:

MARKETPLACE_ASIN_PAGE_VIEW_METRICS

Role: [Selling Partner Insights](#)

Availability: Sellers

Marketplace

availability: DE, FR, IT, ES, NL, PL, SE, BE (EU-8), UK, and IE.

Requested/scheduled:

This report can be requested or scheduled.

Provides information on the ASIN page view (glance view) metrics for the DE, FR, IT, ES, NL, PL, SE, BE (EU-8), UK, and IE marketplaces, with data available up to the last seven days. A page view is a customer view of the product's detail page for a given ASIN. Developers have the

option to specify a start and end date to retrieve data within that range. If no dates are specified, the report will provide data for the latest available day. For marketplaces and product categories where the seller does not have a meaningful presence (40 units sold), the report will not return any data.

This report requires the following parameters:

VAT Calculation Service

>

- `reportType` :
`MARKETPLACE_ASIN_PAGE_VIEW_METRICS`

Amazon Seller Data Access

Best Practices

>

- `reportOptions` :
An object that is used to specify the `productType` .
- `marketplaceIds` :
An array of `marketplaceIds` from the supported marketplaces.

Refer to the [marketplaceAsinPageViewMetrics.json](#) schema for additional details on usage.
