Replenishment API

Learn how to return a selling partner's replenishment program metrics and offer information.

You can use the [Replenishment API](#) to retrieve information about a selling partner's replenishment program business. Currently, the Subscribe & Save replenishment program is supported. With the Replenishment API, you can create applications that return metrics about a selling partner's replenishment business performance and information about their replenishment program offers.

Some attributes or use cases might not be applicable to both sellers and vendors. Refer to the [Replenishment API v2022-11-07 reference](#) for details.

The Replenishment API is available wherever Amazon Subscribe & Save is live. The API is also available to vendors and Fulfillment by Amazon (FBA) selling partners.

Current version	Legacy versions	Availability	Sandbox
v2022-11-07 (Reference Model)	None	Sellers and Vendors	Static

► [Release notes](#)

To learn more about the terms that are used on this page, refer to [Terminology](#).

Use cases

- [Get all of a selling partner's replenishment offers filtered by specific criteria](#): Return a selling partner's replenishment (currently Subscribe & Save) offers based on filtering criteria.
