Report Type Values

Use Report Type values to specify the type of report you want the Reports API to return.

 Note

The retention of generated reports varies by report type. If an explicit retention is not specified for a report type, then the report will be retained for 90 days. If the generated report is not downloaded within the retention period, you can generate the report again.

Use a `reportType` value to specify the type of report that you want to request using the Reports API.

In the report descriptions, *Seller Central* refers to sellers who have registered to sell on Amazon in the past few years; *Marketplace* refers to legacy sellers who registered to sell on Amazon prior to the last few years. All reports are available to both Marketplace and Seller Central sellers unless otherwise noted.

For more information about registering in Amazon's Brand Registry, refer to [Build and protect your brand](#).

 Info

To view available report schemas, refer to our [Schemas](#) folder on our GitHub repo.
