Frequently Asked Questions >

Retrieve Seller Wallet account details

Get details and balances for an Amazon Seller Wallet account

Learn how to review Seller Wallet account details and balances on a Seller's account.

Prerequisites

To complete this tutorial, you must have:

- Authorization from the selling partner for whom you are making calls. Refer to the [Authorizing Selling Partner API applications](#) for more information.
- The [Account Information Service Provider role](#) assigned to your developer profile and selected in the App Registration page

for your application.

Step 1. Retrieve a list of Seller Wallet accounts

Call the `listAccounts` operation and locate the `accountId` value of the account for which you want to retrieve details; you use this value in the next steps.

Step 2. Retrieve Seller Wallet account details

Call the `getAccount` operation with the `accountId` value that you retrieved in Step 1.

Step 3. Retrieve a Seller Wallet balance

Call the `listAccountBalance` operation with the `accountId` value you retrieved in Step 1.
