Return a batch of FOEP data for a set of SKUs

Learn how to return a set of responses for up to 40 requests for featured offer extended price data.

Learn how to return a set of responses for up to 40 requests for featured offer extended price data.

To help a seller compete for featured offer placement on the product detail page (for items listed in new condition that ship nationwide), use the `getFeaturedOfferExpectedPriceBatch` . To compete for selection as the featured offer, the seller and their listed items must be eligible.

You can help the seller compete by returning the FOEP for a SKU. Because competing offers can change, featured offer status isn't guaranteed. Different offers can be featured based on other factors, including fulfillment capabilities to

a specific customer. The `getFeaturedOfferExpectedPriceBatch` operation returns batch responses that contain up to 40 FOEP requests. If there are no other competing offers that ship nationwide, Amazon might not return an FOEP value.

! Warning

FOEP values are automatically generated, so be sure to carefully verify the calculated values. All sellers using the API are responsible, as the retailer of record for their offers, for setting their prices independently and in compliance with applicable laws and pricing regulations.

The `getFeaturedOfferExpectedPriceBatch` operation is available in all [marketplaces](#). `sampleLocation` is the representative location for the segment where the offer is featured. You

Return a batch of FOEP data for a set of SKUs

can use

`sampleLocation` in the request to the`getFeaturedOfferExpectedPriceBatch`

> operation to get the Featured Offer Expected Price (FOEP) for a specific location. This feature is currently available in US, CA, MX, BR, DE, UK, IT, FR, ES, IN, JP, AU, SG marketplaces. For more information about Product Pricing API operations, associated data types, and schemas, refer to the [Product Pricing v2022-05-01 API Reference](#).

Prerequisites

To complete this tutorial, you must have:

- Authorization from the selling partner for whom you are making calls. For more information, refer to [Authorizing Selling Partner API applications](#).
- The [Pricing role](#) assigned to your developer profile.
- The Pricing role selected on the app registration page for your application.

[tedPriceBatch](#)

operation is a batch API.

The batch request must use an HTTP `POST` method with a body parameter that contains a list or set of individual requests. The response is a batch response that contains the list of individual HTTP responses, where each response maps to one of the original requested SKUs in the batch.

To return FOEP data, call the

[getFeaturedOfferExpectedPriceBatch](#)

operation.

reason why no FOEP value is returned, when applicable. The possible values are:

Result status	Description
VALID_FOEP	The offer was eligible for FOEP. Amazon returned a valid FOEP value.
NO_COMPETING_OFFER	The offer might be eligible to become featured, but there are no other offers for that ASIN that are also eligible to become the featured offer.
OFFER_NOT_ELIGIBLE	The offer was not eligible to become the featured offer.
OFFER_NOT_FOUND	The offer was not found. It might be unbuyable, or the merchant might not be qualified to be featured.

Result status	Description
ASIN _NOT_ ELIGI BLE	The ASIN is not eligible for an FOEP value.
