Welcome to SP-API Documentation

What is the Selling Partner API?

Selling Partner API Onboarding Overview

Role Mappings for SP-API Operations

Learn which roles enable you to access SP-API operations.

[Roles](#) control access to all API operations, reports, feeds, and notifications in the Selling Partner API (SP-API). When you create a developer account, you must request and qualify for the specific roles that align with your intended use of the SP-API. Amazon reviews all role requests, with additional scrutiny for restricted roles.

This document helps you determine which role you need to access specific SP-API operations. The following points explain how roles work:

- Each operation requires at least one role from its

list of possible roles (unless the operation is marked as [grantless](#)).

- For a given operation, you don't need all listed roles; any one of them grants you access.
- Vendors have access to the following roles: [Amazon](#), [Fulfillment](#), [Amazon](#), [Warehousing and Distribution](#), [Brand Analytics](#), [Direct to Consumer Shipping \(Restricted\)](#), and [Product Listing](#).

Note

In the following sections, when an operation's table lists multiple roles, you must be authorized for at least one of the roles to call the operation. However, operations that access restricted
