Frequently Asked Questions >

SP-API SDKs

Build SP-API applications with pre-built and generated SDKs.

SP-API offers a collection of software development kits (SDKs) to connect with our APIs. Depending on your preference, you can choose to use a prebuilt or custom SDK:

- **Prebuilt SDK:**
Prebuilt SDKs are maintained by Amazon and can be added to your application with fewer lines of code. SP-API supports prebuilt SDKs for [C#](#), [Java](#), [JavaScript](#), [PHP](#), and [Python](#).
- **Custom SDK:**
Custom SDKs use a self-service model, where you manually generate an SDK to suit your specific needs. SP-API supports

SP-API SDKs

custom SDKs for [C#](#), [Java](#), [Node.js](#), and [Python](#).
