What is the Selling Partner API?

Selling Partner API Onboarding Overview

Onboarding as a Developer

Onboarding as a Service Provider

Terminology

Frequently Asked Questions

Selling Partner API Onboarding Overview

Determine which Selling Partner API onboarding path applies to you.

Before you onboard to the Selling Partner API (SP-API), it's important to understand which onboarding path to follow.

Developers

Developers build software applications that automate tasks for sellers. Developers can:

- **Create software tools:** Developers create applications that call the SP-API to automate selling partner tasks.
- **Build technical integrations:** Connect seller data to external systems or create new functionality.

Learn How Sellers Authorize Service Providers

Selling Partner API Roles >

- **List apps in the Selling Partner Appstore:** Some developers, called public developers, make their applications available in the Selling Partner Appstore for sellers to install. Private developers create internal apps specific to a business.
- **Examples:** Inventory management software, repricing tools, analytics dashboards, order management systems.

If you're a developer, follow [Onboarding as a Developer](#).

Service providers

Service providers are service-focused businesses that help sellers through manual account management and consulting. Service providers can:

- **Provide hands-on services:** Account management, advertising optimization, inventory planning, business consulting.

Special Authorization Types >

INTEGRATION

Building Robust Amazon SP-API Applications

SP-API SDKs >

- **Access Seller Central directly:** Work through the web interface that sellers use to manage their businesses
- **Focus on expertise and strategy:** Offer specialized knowledge and manual optimization rather than automated tools.
- **Get listed in Service Provider Network:** Amazon's marketplace where sellers discover and hire service providers.
- **Examples:** Marketing agencies, account management consultants, inventory specialists, business strategists.

If you're a service provider, follow [Onboarding as a Service Provider](#).

Can you be both?

Yes! Some companies offer both services and software solutions. If you want to build SP-API applications in

Delete an Application From Your Developer Account

CALLING THE SP-API

Configuration Details >

Call Structure >

Development Tools >

Performance Management >

addition to providing services, complete both onboarding processes: the developer onboarding tutorial for the application side, and the service provider tutorial for the service side.
