Service Provider Registration and Role Approval Process Overview

Essential steps for service provider registration, role approval, and employee access so that sellers can grant service providers permissions.

This guide covers all required steps that service providers must perform to prepare sellers to be able to grant the service provider permissions in Seller Central. After a service provider completes these steps, sellers can grant the service provider permissions in Seller Central for the Seller Central roles that Amazon approved for the service provider.

If a service provider doesn't complete the Seller Central role approval process, sellers can't grant the service provider permissions in Seller Central.

Service providers must first complete the role approval process in Solution Provider Portal and receive Amazon's approval for the roles. Without this approval, sellers will find the corresponding role permissions greyed out in Seller Central and won't be able to grant access to the service provider. Roles must be approved in Solution Provider Portal before

How service provider authorization works

Service providers create **one company account** in Solution Provider Portal. The service provider administrator registers the company, applies and gets approved for Seller Central roles, and invites employees to join the same account. This process enables sellers to give a one-time authorization to the service provider organization. After a service provider is authorized by a seller, the service provider administrator can then independently manage access permissions for their own employees.

Key principle: Create only one Solution Provider Portal account per service provider company. Service provider employees join this company account—service provider employees

don't create separate accounts.

Key points

Before you read the detailed steps, keep the following essential points in mind:

- **One account per service provider company:** Service provider administrators create the Solution Provider Portal account, and the service provider employees join the account by invitation from the administrator.
- **Service provider employees must be invited:** Service provider administrators must invite service provider team members.
- **Seller Central role approval is required:** Service providers must complete role approval for sellers to grant permissions. Sellers can grant service providers permissions in Seller Central using the process described in [Learn How Sellers Authorize Service](#)

SECURITY AND COMPLIANCE

SP-API Security and Compliance Overview

[Providers](#), and role-based permissions will no longer appear greyed out.

- **Identity verification is required:** Both service provider administrators and service provider employees must complete identity verification.

- **Email addresses must be correct:**

- **For administrators:** If you currently access Seller Central accounts as a secondary user, use the email address that you use to sign in to Seller Central. If you're new to Amazon, use any valid email address of your choice.
- **For employees:** Administrators should use the employee's Seller Central email address if they have one, or ask new employees for

their preferred email address.

- In any case, this email address will become the sign-in email for both Solution Provider Portal and future Seller Central access.

Service provider administrator: Complete company registration

As the service provider administrator, you must complete the following steps in order. **If you stop after identity verification, sellers can't grant you permissions in Seller Central.**

Amazon Seller Data Access Best Practices >

Step 1: Create your company account

1. Navigate to [Solution Provider Portal](#).
2. Create your Solution Provider Portal account as follows:

Step 3: Apply for and get approved for Seller Central roles

This step is the critical step that enables sellers to subsequently provide you permissions.

1. Select the category of service that you provide and apply for the Seller Central role(s) that you require access to. For details, refer to [Complete the Service Provider profile](#).
2. Wait for approval (processing can take up to 10 business days).
3. **Verify your approval status** before proceeding.

**Important**

Until you are approved for roles, sellers can't grant you permissions in Seller Central. The role-based

A service provider employee can't access seller accounts

Problem: A service provider employee completed identity verification but still can't access seller accounts.

Solution: To resolve the access issue:

- Confirm that your administrator delegated the appropriate permissions to you within Solution Provider Portal.
- Ensure that you are signing in to Seller Central using the email address that is associated with your Solution Provider Portal account (permissions are linked to this email address).
