SP-API Deprecation Schedule

Set service job appointments and assigning appointment resources

Learn how to add or reschedule appointments for service jobs, and assign appointment resources.

Learn how to add or reschedule appointments for service jobs, and assign appointment resources.

Reschedule appointments for service jobs and assign appointment resources with the following operations:

- [addAppointmentForServiceJobByServiceJobId](#)
- [rescheduleAppointmentForServiceJobByServiceJobId](#)
- [assignAppointmentResources](#)

These operations confirm appointment preferences or add an initial appointment to any other valid start time in the future. Service sellers can reschedule an appointment to another valid start time in the future along with a reschedule reason.

Prerequisites

To complete this tutorial, you need:

- Authorization from the seller for whom you are making calls. Refer to [Authorizing Selling Partner Applications](#) for more information.
- A service job identifier assigned to the service provider. Only jobs assigned to the service provider can be accessed.
- A future-dated appointment start time pre-configured in Amazon Systems for the service provider.

Add appointment for service job by service job ID

The [addAppointmentForServiceJobByServiceJobId](#) operation confirms an initial appointment preference or sets an initial appointment.

Note

- You can only add appointments in available future-date appointment slots (`startTime` + duration) that are pre-configured in Amazon Systems.
- If `durationInMinutes` is not provided, then the pre-configured service duration is picked automatically.
- If `durationInMinutes` is provided, then it should match the pre-configured appointment duration in Amazon Systems.

Reschedule an appointment by service job ID

The `rescheduleAppointmentForServiceJobByServiceJobId` operation reschedules a service job appointment and provides a reason for rescheduling.

Reschedule reason codes by marketplace

Reason code	Reason description	Default	Heavy bulk	Recurring
RS1	Customer requested	-	DE	-
RS2	Product will not be delivered in time	-	DE	-
RS3	Need follow-up visit	-	DE	-
RS4	Provider cannot meet original appointment	US, AE, JP	US, DE, JP	US, JP
RS5	Product incompatible or broken	-	DE	-
RS6	Work is different than scoped	US, IN, UK, DE, AE, JP	US, IN, UK, JP	-
RS7	<i>Code not in use</i>	-	-	-
RS8	No longer works with customer schedule	UK, DE	US, UK, JP	US, JP

Special Authorization Types	>	RS9	Problem with Amazon product or its delivery	US, IN, UK, DE, AE, JP	US, IN, UK, JP	-
INTEGRATION						
Building Robust Amazon SP-API Applications						
SP-API SDKs	>	RS10	Problem with non-Amazon product, delivery, or service	US, UK, DE, AE, JP	US, UK, JP	-
		RS11	Customer didn't show up	US, IN, UK, DE, AE, JP	US, IN, UK, JP	US, JP
		RS12	Provider cannot meet original appointment	IN, UK, DE	IN, UK	-
		DRS1	Unable to access location	-	US, JP	-
		DRS2	Customer requested a future date	-	US, JP	-
		DRS3	Customer declined	-	US, JP	-
		DRS4	Delivery will be too late	-	US, JP	-
Delete an Application From Your Developer Account		DRS5	Can't find access	-	US, JP	-
CALLING THE SP-API						
Configuration Details	>	DRS6	Business closed	-	US, JP	-
		SRS1	Customer requested cancellation	-	US, JP	-
Call Structure	>	Note The <code>RESOURCES_UNASSIGNED</code> warning code in the response provides details of preassigned resources to the appointment that do not have an assignment. The service provider should assign new resources to the rescheduled appointment.

SELLING PARTNER APPSTORE

- What is the Selling Partner Appstore?
- List Your App on the Selling Partner Appstore

The `assignAppointmentResources` operation assigns or updates resources in appointments for their service orders. This operation performs resource validations against a number of criteria, such as skills, available capacity, and coverage area inclusions, before setting an appointment resource assignment.
