Set up credential rotation notifications

Learn how to set up a credential rotation notification.

This tutorial describes how to set up a credential rotation notification that alerts you when your credentials need to be rotated.

Prerequisites

To successfully complete this tutorial, you must have access to:

- The Developer Console
- Amazon SQS
- An SQS queue

Step 1. Grant SP-API permission to write to your SQS queue

To receive notifications, you must grant the Selling Partner API (SP-API) permission to write to your SQS queue.

1. Open the [AWS Management Console](#) and sign in with your AWS credentials.
2. From the console, open **Amazon Simple Queue Service**.
3. Select the Standard queue where you want to receive notifications.
4. Choose the **Access Policy** tab.
5. From the **Access policy (Permissions)** section, select **Edit**. The **Edit Test Queue** page opens.
6. Scroll down to **Access policy**, then select the **Policy generator** link. The AWS Policy Generator opens in a new tab.
7. In Step 1 of the policy generator, select **SQS Queue Policy**.
8. In Step 2 of the policy generator:
 - a. Set **Effect** to **Allow**.
 - b. Set **Principal** to 437568002678.
 - c. Set **Actions** to `SendMessage` and `GetQueueAttributes`.
 - d. Enter the **SQS ARN** value in **Amazon Resource Name (ARN)**.
 - e. Choose **Add Statement** and verify the details.

Set up credential rotation notifications

9. In Step 3 of the policy generator, select **Generate Policy**. A dialog box with the new policy opens.
10. Copy the policy.
11. Navigate back to the Amazon SQS queue, open the **Access policy** tab, then paste the policy into the **Access Policy (Permissions)** section.
12. Save the changes.
13. Reference the queue's **Details** section and note the ARN for this queue, as you need it to register your queue in the next step.

Step 2. Register your SQS queue to receive expiring credential notifications

1. Sign in to your developer account on the [Solution Provider Portal](#). Navigate to the **Developer Console** page that lists all your applications.

Note

For **Seller Central** users, sign in to [Seller Central](#) for your marketplace and navigate to **Apps and Services**, then [Develop Apps](#).

For **Vendor Central** users, sign in to [Vendor Central](#) for your marketplace and navigate to **Integration**, then [API Integration](#).

2. Select **Notification Preferences**.
3. On the **Subscription** page, find the application for which you want to receive expiring credential notifications.
4. In the **Application Client Secret Expiry** row, select the SQS ARN where you want to receive the expiring credential notification.

Step 3. Listen for expiring credentials

Amazon sends a notification to the registered queue when the application is approaching LWA credential expiration. You can *listen* to your SQS queue and rotate your credentials when you receive the notification.

Use an Amazon SQS client to receive the message from your pre-registered queue. Follow the [ReceiveMessage](#) documentation.

Notification example

```
JSON
{
  "notificationVersion": "1.0",
  "notificationType": "APPLICATION_OAUTH_CLIENT_SECRET_EXPIRY",
  "payloadVersion": "2023-11-30",
  "eventTime": "2024-01-10T02:15:10.045Z",
  "payload": {
    "applicationOAuthClientSecretExpiry": {
      "clientId": "amzn1.application-oa2-client.xxxxxxxxxxxxxxxxxxxxxxxxxxxxxx",
      "clientSecretExpiryTime": "2024-03-03T22:06:39.224Z",
      "clientSecretExpiryReason": "PERIODIC_ROTATION"
    }
  }
}
```
