Settlement Reports

Settlement Reports for the Selling Partner Reports API.

Settlement reports cannot be requested or scheduled. They are automatically scheduled by Amazon. You can search for these reports using the `getReports` operation.

Flat File Settlement Report

! Important

This report is deprecated. For more details, refer to the [SP-API Deprecation Schedule](#).

reportType value:

`GET_V2_SETTLEMENT_REPORT_DATA_FLAT_FILE`

Role: [Inventory and Order Tracking](#), [Finance](#)

AUTHORIZATION

Authorize Applications

Renew Authorizations

Revoke Authorizations

Authorization Limits

Special Authorization Types

INTEGRATION

Building Robust Amazon SP-API Applications

SP-API SDKs

Availability: Seller

Central sellers

Report output type:

Tab-delimited flat file

> A settlement report. This report replaces the Flat File Settlement Report and XML Settlement Report. Price columns are condensed into three general-purpose columns:

- amount-type
- amount-description
- amount

> The amount-type and amount-description columns contain the type of charge or fee you have incurred, and indicates whether different fees are related to a common type. Amount values always populate in a single amount column, so there's no need to parse the rows to find a number, even if new fees or transaction types are introduced in the future. Additionally, amounts are displayed in local currency formats (for example, 95,00 for EU instead of 95.00).

For Seller Central sellers only.
