What is the Selling Partner API?

Selling Partner API Onboarding Overview >

Solicit feedback for an order

Learn how to use the Solicitations API to solicit a product review and seller feedback for an order.

Learn how to use the Solicitations API to solicit a product review and seller feedback for an order. You first verify that an order is available for solicitation, then create the solicitation request.

Prerequisites

To complete this tutorial, you need:

- An order available for solicitation.
- Authorization from the selling partner for whom you are making calls. For more information, refer to [Authorizing Selling Partner API applications](#).
- The [Buyer Solicitation](#) role or [Product Listing](#)

Selling Partner API Roles

Solicit feedback for an order

role assigned to your developer profile.

- The [Buyer Solicitation](#) role or [Product Listing](#) role selected in the app registration page for your application.

Step 1. Verify that an order is available for solicitation

Call the `getSolicitationActionsForOrder` operation.

Step 2. Create a product review solicitation

If the `productReviewAndSellerFeedback` action is listed in the response, call the `createProductReviewAndSellerFeedbackSolicitation` operation.

API and Seller Central interaction

When you send a review request through the API, note the following differences

[Policies and Agreements](#)[About Facial Data](#)

AUTHORIZATION

[Authorize Applications](#) >[Renew Authorizations](#)[Revoke Authorizations](#)[Authorization Limits](#)[Special Authorization Types](#) >

INTEGRATION

[Building Robust Amazon SP-API Applications](#)[SP-API SDKs](#) >

between the API and Seller Central:

- A review request sent through the API does not flag the order in Seller Central.
- If you click **Request a Review** in Seller Central after you already sent a request through the API, you receive an error message that a review was already requested.
- A second API attempt for the same order returns a `403` status code.
- To check eligibility programmatically before you send a solicitation, use the `getSolicitationActionsForOrder` operation.

Best practices

When you solicit reviews, ensure that you:

- Seek reviews for orders that have been delivered.
- Prompt for feedback within the allowed time frame.

Note that you cannot:

Solicit feedback for an order

- Selectively seek positive reviews.
- Request alterations to existing reviews.
- Offer rewards or incentives for reviews.

For more information on how to ethically navigate solicitations, review the [Anti-Manipulation Policy for Customer Reviews](#).

Turn negative feedback into opportunities

When you receive negative reviews, your effort to resolve the buyer's issue can improve customer satisfaction. Once you have resolved the buyer's problem, call the

`createNegativeFeedbackRemoval` operation from the [Messaging API](#). Sellers can use this operation to ask the buyer to remove the unfavorable feedback. This offers sellers a second chance and underscores their commitment to customer satisfaction.
