# Solution Provider Portal FAQ

Frequently asked questions about the Solution Provider Portal.

## ▼ [What is Solution Provider Portal?](#)

Solution Provider Portal is a single portal for all third parties who offer solutions to help Amazon partners manage their business. Solution Provider Portal provides tools that third parties can use to accelerate the growth of their business and partners, including managing data access, listing solutions, receiving seller authorizations, and growing your business.

### ▼ Who does

#### Solution Provider

#### Portal support?

Solution Provider  
Portal supports the  
following:

- All developers that integrate with Selling Partner API. For definitions, refer to [SP-API Terminology](#).
- Service providers that offer third-party solutions to help sellers manage their business on Amazon. For definition, refer to [Service Providers Terminology](#).

### ▼ What features

#### does Solution Provider Portal offer?

Solution Provider  
Portal offers the  
following features:

- Account unification capabilities for streamlined business management
- An independent environment

for managing  
solution  
provider  
businesses

- API usage dashboard for improved integration efficiency
- User permissions for solution provider organizational-level account access management
- Notification preferences for flexible communication methods

▼ How do I get started with Solution Provider Portal?

If you are a new registration, go to [Solution Provider Portal](#) and choose **Solution Provider Portal**. For service providers, follow the steps to [Register as a Service Provider](#).

For developers, follow the steps to [Register as a Developer](#). If you have an existing Seller Central or Developer Central

account, you will receive a communication from Amazon to start the migration process.

▼ What actions do I need to take?

**Actions for Selling Partner API developers:**

If you're an existing Selling Partner API developer, you'll see a guided workflow to migrate the next time you log into Seller Central and choose **Develop Apps**. During this process, you can consolidate multiple Selling Partner API profiles under one account to simplify your integration and API operations. You can also choose to keep more than one profile for your needs.

New Selling Partner API developers will register directly on Solution Provider Portal to manage their integrations, access the sandbox, create

and list applications, and review usage metrics.

**Actions for service providers:**

Existing service providers currently accessing Seller Central through secondary user permissions or registered with Service Provider Central will receive communications from Amazon to start the migration to Solution Provider Portal, and in the meantime, there is no immediate impact on your accounts or service listings.

For new service providers, you can register and onboard directly in Solution Provider Portal.

▼ What is the timeline to migrate to Solution Provider Portal?

If you are an existing developer, you must migrate your existing Selling Partner API integrations and accounts to

Solution Provider Portal by August 31, 2025 to continue using the Selling Partner API.

If you are an existing service provider, you do not need to do anything until we contact you. We are communicating with service providers on a rolling basis about the requirement on completing registration to Solution Provider Portal.

▼ I saw a reference to an April 10, 2025 service provider deadline. Does that apply to me?

No. We are communicating with service providers on a rolling basis about the timeline for completing registration to Solution Provider Portal. Once you have received a communication from us, please take the required steps to register on Solution Provider Portal. However, until you receive a

communication from us, no action is required to continue using Selling Partner APIs.

▼ What steps should I take if I am already registered as a service provider on Service Provider Network?

If you have an existing Service Provider Network account, you do not need to do anything until we contact you. Your service and/or listing in Service Provider Network will not be impacted.

▼ As a service provider, what action should I take after being contacted by Amazon?

- If you are the administrator of a service provider, please complete registration for your business on [Solution Provider Portal](#)

before the deadline communicated by Amazon via email notification. Registration includes three steps: administrator identity verification, provider business and contact information, and service data access assessment. You can start data access assessment by clicking **Add a service** on Solution Provider Portal's homepage. After receiving approval from Amazon on your data access, you can list your service on the Service Provider Network and start getting seller authorizations. If you are accessing seller accounts today as a secondary user, you can

start migrating your authorizations to **Authorized Partners** in Seller Central's **User Permissions** page.

- If you are an employee of a service provider, please identify the administrator of your service business, and have that individual complete registration on [Solution Provider Portal](#) by the deadline communicated from Amazon. Upon completion, your administrator can add you to their service provider account on Solution Provider Portal.

▼ [What account should I choose when onboarding to Solution Provider Portal?](#)

We recommend using an existing account. However, if you want to decouple from your current account for any business reason, you can create a new account on Solution Provider Portal.

## GET STARTED

Welcome to SP-API Documentation

What is the Selling Partner API?

Selling Partner API Onboarding Overview

### ▼ What does account unification mean?

Account unification involves the consolidation of multiple accounts into a single profile on Solution Provider Portal. All active developer profiles, applications, roles, authorizations, and listings are merged. This process simplifies the management of your API integration at the organizational level, but it doesn't affect how your applications function or how you receive seller authorizations.

### ▼ After account unification, can I choose to separate

[Terminology](#)[Frequently Asked Questions](#) >[SP-API General FAQ](#)[Solution Provider Portal FAQ](#)**CHANGELOG**[SP-API Release Notes](#)[SP-API Deprecation Schedule](#)[SP-API Product Metadata Updates](#)**DIRECTORIES**[SP-API Models](#)[SP-API Seller Use Cases](#)[SP-API Vendor Use Cases](#)[Seller Central URLs](#)[Vendor Central URLs](#)**REGISTRATION**[SP-API Registration Overview](#) >[Developer Registration Request Status](#)[Third-Party Provider Registration](#) >[Service Provider Registration and Role Approval Process Overview](#)[Website Guidelines for Public Developers and Service Providers](#)[User Permissions for Service Providers](#)[Register your Application](#)[Update your Application Information](#)[Rotate your Application's LWA Credentials](#) >[View your Application Information and Credentials](#)[Learn How Sellers Authorize Service Providers](#)[Selling Partner API Roles](#) >[my accounts in the future?](#)

No. Account migration and consolidation cannot be undone. If you need assistance, contact Developer Support.

▼ [Does my Solution Provider Portal account cover all regions?](#)

Yes. Solution Provider Portal is a global site and will help consolidate developer profiles across regions.

▼ [As a developer, will migration impact my listing application on the Selling Partner Appstore?](#)

No. Your application will continue to display and operate on the Selling Partner Appstore.

▼ [Who can initiate migration?](#)

Primary users (business administrators) can initiate migration. Primary users are the owners of the login credentials that are used to

merge, you will receive a message on the user interface, and you will receive an update when the migration resumes. Even in this scenario, your applications and authorizations shouldn't be affected and will continue to work as normal.

▼ As a developer, will my application client credentials or tokens change after migration?

No. There should be no changes in terms of applications credentials. You can update your credentials at any time by rotating the LWA client secret.

▼ As a developer, can I still use Seller Central or Vendor Central after migration?

Your original Seller Central or Vendor Central account will continue to exist after Solution Provider Portal migration.

SP-API Security and Compliance Overview

However, when you access any developer features on Seller Central or Vendor Central, you are redirected to Solution Provider Portal.

▼ As a developer, can I view all of my existing and archival support cases after I migrate to Solution Provider Portal?

In Solution Provider Portal, you will be able to see all of your new cases created in Solution Provider Portal. For existing regional cases, you will be redirected to corresponding regional locations those cases were originally created.

▼ Can I create multiple Solution Provider Portal accounts?

We recommend that you use a single account on Solution Provider Portal to manage all your business needs. However, you can maintain multiple Solution

Provider Portal accounts, if needed.

VAT Calculation Service >

▼ In Solution Provider Portal, I originally chose only **Build applications that use SP APIs** or only **Offer services**. Can I add the other option later?

Yes. If you're a developer or service provider, you can update your account to offer both solutions. To update your account in Solution Provider Portal, choose **Settings** (the gear icon), and then choose **Solution Type Setup**.

Amazon Seller Data Access Best Practices >

▼ How does marketplace registration work in Solution Provider Portal?

Solution Provider Portal accounts are global, not specific to a marketplace. Keep in mind the following points:

- With a single Solution Provider Portal

account, you can operate as a service provider or a developer across all Amazon marketplaces.

- You can register for a Solution Provider Portal account from any country, but the Solution Provider Portal interface always displays the account as being in the United States.

▼ Why can't I accept new invitations from sellers?

If you're a service provider and unable to accept new seller invitations, you might not have completed the required registration and role approval process in Solution Provider Portal.

To resolve this issue, ensure that you completed all steps outlined in
