Step 1: Learn the Service Provider Registration and Permissions Workflow

Learn the process that service providers and sellers take so that the service provider can act on behalf of the seller.

Before you begin onboarding as a service provider, it is critical that you understand the workflow in which service providers, their employees, and sellers interact from a permissions standpoint. By understanding this process, you can avoid common mistakes that prevent sellers from granting you permissions.

Phase 1: Service provider setup

The service provider completes the following steps to establish the business account in Solution Provider Portal, get Amazon's approval for the necessary Seller Central roles, and invite employees to join the Solution Provider Portal account.

Step	Who	What	Where
1	Service provider administrator	Verifies their identity and creates the Solution Provider Portal account for the service provider's business.	Solution Provider Portal
2	Service provider administrator	Applies for Seller Central roles that, after Amazon	Solution Provider Portal

Phase 2: Establishing the connection between the seller and service provider

After Amazon approves the service provider for one or more Seller Central roles, the seller and service provider complete the following steps to enable the service provider to take actions on the seller's behalf.

Step	Who	What	Where
1	Seller	Adds the service provider as an authorized partner.	Seller Central
2	Seller	Shares the invitation link with the service provider administrator.	Email or direct message
3	Service provider administrator	Clicks the link in the email from the seller, and is taken to Solution Provider Portal.	Solution Provider Portal
4	Service provider administrator	Triggers an invitation to the seller.	Solution Provider Portal
5	Seller	Accepts the invitation from the service provider and grants the service provider permission to Seller Central roles. The seller can only select roles for which the service provider was approved by Amazon in the service	Seller Central

Important reminders

To set you up for success in the registration and permissions process, review the following points.

★ Important reminders

- Create **one** account in Solution Provider Portal on behalf of your business, and then invite employees to join the account.
- Get Amazon approval for Seller Central roles **before** you connect with sellers.
- Sellers can only grant permissions for the Seller Central roles for which you have been approved by Amazon. If you haven't been approved by Amazon for any Seller Central roles, the seller sees all permission options for you greyed out in Seller Central.

Next step

To get started, proceed to [Step 2: Create a Solution Provider Portal Account for Your Company](#) where you create a Solution Provider Portal account for your company.
