## GET STARTED

Welcome to SP-API Documentation

What is the Selling Partner API?

Selling Partner API Onboarding Overview &gt;

Onboarding as a Developer &gt;

Step 1: Prepare for Registration

Step 2: Create a Solution Provider Portal Account

Step 3: Create a Developer Profile

Step 4: Register a Sandbox Application

Step 5: Make Your First Call to the SP-API Sandbox

Step 6: Set up the Authorization Workflow

Step 7: Register Your Production Application

Step 8: Call the SP-API in Production

Step 9: Test Your Application

Step 10: List Your Application

Onboarding as a Service Provider &gt;

Terminology

Frequently Asked Questions &gt;

## Step 3: Create a Developer Profile

Create a developer profile to manage your preferences and permissions.

Before you develop applications that integrate with the Selling Partner API (SP-API), create a developer profile in the Solution Provider Portal.

### ★ Tips for success

- Have your [developer type](#) (public or private) in mind.
- Know the [roles](#) that you want to apply for. You can apply for additional roles in the future

if you  
need to.

- Provide detailed responses.
- Respond promptly to questions and follow up if you don't hear back within expected timeframes.

**Prerequisites**

Before you create a developer profile, follow [Step 2: Create a Solution Provider Portal Account](#).

**Steps to create a developer profile****Warning**

Only create a developer profile in the Solution Provider Portal if you are a developer.

To create a developer profile, take the

## INTEGRATION

Building Robust Amazon SP-API Applications

SP-API SDKs >

following steps:

1. Sign in to [Solution Provider Portal](#) with your Amazon credentials.
2. Choose **Get started after your identity is verified**.
3. On the **Developer Profile** page:
  1. For **Contact Information**, enter your organization name, website, country, and the primary contact.
  2. For **Data Access**, select public or private developer. For details about public and private developers, refer to the definition of [developer](#).
  3. For **Roles**, select the roles that you want to assume. For details about roles, refer to [Roles in the Selling Partner API](#). If you select restrictive roles, the form

Delete an Application From Your Developer Account

expands to include additional questions about your use case.

## CALLING THE SP-API

Configuration Details >

4. For **Use Cases**, describe how you intend to use the SP-API.

Call Structure >

5. For **Security Controls**, carefully review and answer all the questions about your security practices. Your answers should accurately reflect how you implement the security requirements outlined in the Acceptable Use Policy (AUP), the Data Protection Policy (DPP), and the Solution Provider Agreement, which you can find at [Policies and Agreements](#). Be sure to provide complete and

## SECURITY AND COMPLIANCE

SP-API Security and Compliance Overview

Amazon Selling Partner API Guard Implementation Guide 

accurate responses.

6. After you review the [policies and agreements](#), choose the check box to acknowledge your agreement.

4. Choose **Register**. Amazon reviews your application and sends you an email to the email address associated with your developer profile. The review time depends on the [roles](#) that you request:

1. **Standard (non-restricted) roles:** Amazon performs a basic review of your business requirements and verifies your security measures. This review process typically takes one to two weeks to complete.

2. **Restricted roles:** For roles that involve PII, there is a three-stage

review  
process:

1. **Business review:**

Amazon evaluates your technical implementation plans, assesses your business case, confirms your readiness to launch, and reviews your geographic coverage requirements.

2. **Security review:**

Amazon examines your information security controls, evaluates your data protection measures, and verifies your compliance documentation.

3. Technical review:

You meet with an Amazon solution architect to discuss your security architecture in detail and verify your specific security controls.

Next steps

While you wait for Amazon to approve your developer profile, you can proceed to [Step 4: Register a Sandbox Application](#).
