What is the Selling Partner API?

Selling Partner API Onboarding Overview

Terminology

Frequently Asked Questions

Submit an acknowledgement

Learn how to use the Vendor Direct Fulfillment Orders API to submit an acknowledgement.

Learn how to use the Vendor Direct Fulfillment Orders API to submit an acknowledgement. The `submitAcknowledgement` operation allows vendors to accept or reject a purchase order for fulfillment. Amazon expects a complete acknowledgement, including all purchase order line items of the purchase order. If the vendor does not provide all line items of the purchase order in the acknowledgement, Amazon does not accept the partial acknowledgement.

Amazon expects the vendor to submit the acknowledgement within 24 hours. The acknowledgement must be an accurate view of the actual shipment quantities and items. The order must be accepted or rejected in its entirety. Partial shipment is not accepted.

Order acknowledgement verification

Vendors can verify the status of the original/updated version of the order acknowledgement using [Vendor Central](#) or using the Direct

Fulfillment Transaction

Management API. Allow the system to take up to 15 minutes to show the original/updated version after submission. If Vendor Central is not showing the correct values for the acknowledgement, open a [Contact Us](#) case in Vendor Central.

The following diagram shows the integration workflow when acknowledging orders.

Business requirements

Can a vendor increase the original quantity submitted in the purchase order using the `submitAcknowledgement` operation?

No, Amazon does not allow the vendor to send a higher quantity in the acknowledgement than what was submitted in the purchase order.

>

Is it a requirement to send an order acknowledgement for each purchase order?

Yes, in order to update the status of an order in the Amazon system correctly, Amazon requires PO confirmation using the API or Vendor Central. If you are unable to meet our order acknowledgement requirements using the API, you must confirm your POs using Vendor Central. Please contact your Amazon business representative if you do not have a Vendor Central account.

Is it a requirement to provide every PO line item in the corresponding order acknowledgement?

Yes, so Amazon can update the order status correctly.

How should invalid items or details on an order be reported using the order acknowledgement?

Do not process or ship an item that arrived with an invalid item number on the order. Please return the invalid item number on the acknowledgement and acknowledge it with one of the following codes.

The following list is an example of the codes that can be used in the document. Amazon and the vendor mutually agree upon a list of codes that are appropriate for their relationship.

Submit an acknowledgement

- "53" Canceled due to USPS > \$400
- "54" Canceled due to Missing AmazonShipID
- "55" Canceled due to Missing AmazonOrderID
- "56" Canceled due to Missing LineItemId
- "71" Canceled due to discontinued item

Amazon acknowledgement

Amazon expects an acknowledgement even if all the line items on the purchase order were invalid and did not produce an order or invoice.

Is it a requirement that I provide an acknowledgement code for all line items regardless of status?

Yes, it is required so we can correctly update the status of the order. If the acknowledgement code is omitted, the acknowledgement is rejected in our system.

What is the policy at Amazon.com on partial shipments? How should partial shipments be reported when submitting an order acknowledgement?

Partial shipments are not allowed. Vendors need to either confirm or reject the full order (fill or kill model).

Prerequisites

To complete this tutorial, you need:

- Authorization from the selling partner for whom you are

Amazon Seller Data Access	
Best Practices	>

Submit an acknowledgement making calls. For more information, refer to [Authorizing Selling Partner API applications](#).

- The [Direct-to-Consumer Shipping \(Restricted\)](#) role assigned to your developer profile.
- The [Direct-to-Consumer Shipping \(Restricted\)](#) role selected in the app registration page for your application.

Submit an acknowledgement

You must provide an order acknowledgement code for all line items in order for Amazon to update the order status.

To submit order acknowledgments, call the `submitAcknowledgement` operation.
