Frequently Asked Questions >

Submit credit notes

Learn how to programmatically submit credit notes to Amazon.

Learn how to programmatically submit credit notes to Amazon for returns, pricing corrections, and allowances.

Prerequisites

To complete this tutorial, you need:

- Authorization from the selling partner for whom you are making calls. For more information, refer to [Authorizing Selling Partner API Applications](#).
- The [Vendor Retail Procurement Invoices role](#) assigned to your developer profile.

Send credit notes

You can use the `submitInvoices` operation to send credit notes to Amazon.

A credit note lists the products, quantities, and agreed prices for products or services that you provide to Amazon, but Amazon returns or does not receive. A credit note can be

issued in the case of damaged goods or errors in price when allowances or rebates are agreed on beforehand between Amazon and the vendor.

 **Note**

Use the `submitInvoices` operation to submit credit notes in ES, IN, IE, ZA, BE, FR, EG, PL, NL, GB, DE, SE, SA, and IT marketplaces. Credit notes are not supported in AE and TR marketplaces.

Credit notes supported by Amazon

Accounts Payable (AP) credit notes	Accounts Receivable (AR) credit notes
PQV credit Credit for items billed but not received, or credit for duplicate payments.	Returns Credit for the items returned to the vendor due to, for example, damaged goods, goods wrongly shipped, and overstock.
PPV credit Credit for items billed at a higher/lower cost.	COOP (for example, Price Protection, Damage Allowance) COOP Credits
