SP-API Release Notes

Submit or update a shipment request

Learn how to submit, update, or cancel shipment requests.

! Important

`SubmitShipments` is available for WePay (Collect) vendors in North American and EU marketplaces. The operation only applies to standard pallets. Non-standard pallets are not supported.

The `SubmitShipments` operation enables WePay (Collect) vendors to submit requests for the pickup of their shipments by Amazon. You can also update or cancel submitted requests with this operation.

Prerequisites

To complete this tutorial, you need:

- Authorization from the selling partner for whom you are making calls. For more information, refer to [Authorizing Selling Partner API Applications](#).
- The [Vendor Retail Procurement Shipments role](#) assigned to your developer profile.

Create a shipment request

SP-API Deprecation Schedule

SP-API Product Metadata Updates

To create a new shipment request with the `SubmitShipments` operation, complete the following:

Step 1. Check that the purchase order is confirmed.

Unconfirmed purchase orders cause the request to fail.

Step 2. Add required values to the request.

Include all required fields in the request. Set the following fields with the appropriate values:

Field	Value
<code>transactionType</code>	New
<code>vendorShipmentIdentifier</code>	A unique identifier for the shipment
<code>requestedPickUp</code>	A date at least two business days after the current date
<code>sellingParty.partyId</code>	Vendor code
<code>shipFromParty.partyId</code>	Warehouse identifier

For example:

JSON

```
{
  "shipments": [
    {
      "vendorShipmentIdentifier":
        "00050003",
      "transactionType":
        "New",
      "transactionDate":
        "2019-08-07T19:56:45.632",
      "shipmentFreightTerm":
        "Collect",
      "sellingParty": {
        "partyId": "PQRSS"
      },
      "shipFromParty": {
        "address": {
          "name": "ABC"
```

Use the **Shipments** page in [Vendor Central](#) or the [Vendor Transaction Status API](#) to verify the status of your shipment request. If the status of the posted request doesn't appear after 30 minutes, submit a support case by navigating to **Vendor Central > Support > Contact Us > API Integration**.

After you submit your request, you can call the [GetShipmentDetails](#) operation to obtain routing instructions, which you'll then use to submit the Advance Ship Notice (ASN) with the

[SubmitShipmentConfirmations](#)

operation.

Update a shipment request

To update a shipment request, provide the `vendorShipmentIdentifier` of the existing shipment you want to update. Modify fields as needed, noting the following constraints:

- The `vendorShipmentIdentifier`, `buyerReferenceNumber`, and `sellingParty.partyId` must remain identical to the original request.
- You can only modify `requestedPickUp` after a carrier is assigned.

When ready, submit the request.

Cancel a shipment request

You can cancel a shipment request both before and after a carrier is assigned and routing is scheduled. To cancel a previously submitted shipment request, match the following fields from the original request:

- `vendorShipmentIdentifier`
- `buyerReferenceNumber`
- `sellingParty.partyId`
- `shipFromParty.partyId`
- `shipToParty.partyId`

Set the `transactionType` to `Cancel` and submit the request. For example:

JSON

```
{
  "shipments": [
    {
      "vendorShipmentIdentifier":
        "00050003",
      "buyerReferenceNumber":
        "1234567",
      "transactionType":
        "Cancel",
      "transactionDate":
```
