Submit order acknowledgement

Learn how to accept or reject a purchase order for fulfillment.

You can use the `submitAcknowledgement` operation to accept or reject a purchase order for fulfillment.

Prerequisites

To complete this tutorial, you need:

- Authorization from the selling partner for whom you are making calls. For more information, refer to [Authorizing Selling Partner API Applications](#).
- The [Vendor Retail Procurement Orders role](#) assigned to your developer profile.

You must provide a complete acknowledgement, including all purchase order line items for the purchase order. If you do not provide all line items for the purchase order in the acknowledgement, Amazon implicitly rejects the missing line items. If the acknowledgment code is omitted, the acknowledgment is rejected.

The cost price in the acknowledgement must match the invoiced unit cost price. Book vendors are required to provide a list price and discount multiplier. The price cannot be higher than the price submitted in the purchase order.

Submit the acknowledgment within 24 hours, including backordered items. The acknowledgment must be an accurate view of the actual shipment quantities and dates.

You must submit an updated acknowledgment within 48 hours for any changes to quantity, price, ship dates, or delivery dates. You can submit a full acknowledgment update or update only a specific line item. Amazon always treats an update as a replacement of the earlier acknowledgment for the line item. After 48 hours, we only expect to receive updates to ship dates or delivery dates.

Authorization Limits

You must return the unit cost price in the acknowledgment. Ensure the cost price matches the unit cost price that is invoiced. Amazon payment systems compares the two and might delay payment if they do not match. Book vendors must provide a list price and discount multiplier.

If the first acknowledgment code for a specific line item was `rejected` , you cannot change this with your update to either `accepted` or `backordered` . You must include a `rejectionReason` when using the `rejected` code. Valid values are `TemporarilyUnavailable` (items are currently not available), `InvalidProductIdentifier` (item cannot be found with the provided identifier), and `ObsoleteProduct` (item is no longer sold).

Acknowledgement code	Description
Accepted	Vendor accepts the order items for fulfillment.
Backordered	Vendor placed a backorder to fulfill the original order and provides a <code>scheduledShipDate</code> or <code>scheduledDeliveryDate</code> that is different than the <code>expectedShipDate</code> or <code>expectedDeliveryDate</code> provided in the purchase order.
Rejected	Vendor rejects fulfillment of the order items. A <code>rejectionReason</code> is required when using this code.

If the price or availability change after the initial acknowledgment has been transmitted, you can manually notify your Amazon business representative. Your Amazon business representative can advise on when, how, and who to notify.

Country-specific business requirements

Functionality	India	Europe	North America
Scheduled Ship Date	Conditional, depends on the freight terms and current business arrangement	Optional	Optional

List Price	Needed only for Book Vendors	Supported	Needed only for Book Vendors

Verify successfully submitted order acknowledgments

You can verify the status of the original or updated version of the order acknowledgment using [Vendor Central](#) or using the [Transaction Status API](#). If the original or updated version doesn't appear after 30 minutes, submit a support case in Vendor Central by navigating to [Vendor Central](#). Select **Support**, then **Contact Us**, and then **API Integration**.

The following diagram shows the integration workflow when acknowledging orders.

You must send an order acknowledgment to successfully update the status of an order in the Amazon system. You can

List Your App on the Selling Partner Appstore

confirm your purchase order using the API, EDI, or Vendor Central. You have 24 hours to accept a purchase order. Vendors must reject any purchase order that is on hold past the 24-hour time limit.

 Note

You cannot send a higher quantity in the order acknowledgment than what was submitted in the purchase order. However, you can confirm a smaller quantity than what was submitted in the purchase order.
