Submit shipment status updates

Learn how to use the Vendor Direct Fulfillment Shipping API to submit shipment status updates.

Learn how to use the Vendor Direct Fulfillment Shipping API to submit shipment status updates. The `submitShipmentStatusUpdates` operation allows vendors to update the transportation status event for shipments that are on route to the final customer. VOC vendors are required to update shipment status (commonly known as scans) during the transportation phase.

Caution

Only Vendor Own Carrier (VOC) vendors can use Shipment Status Updates. This means vendors that use their own carrier for shipment delivery, rather than Amazon carriers, to transport shipments to customers. VOC vendors ultimately cover the transportation costs and the responsibility to deliver shipments to customers.

This information will then be forwarded to Amazon customers on the **your Orders** page and thus will improve visibility on the order tracking and delivery process.

Failure to update shipment status updates can result in bad operational KPIs such as low scan rate and eventually warehouse suspension.

Verification of successfully submitted shipment status updates

Vendors can verify the status of their shipment status updates in **Vendor Central > Orders > Direct Fulfillment Orders** or by using the [Vendor DF Transactions API](#). Allow the system up to 10 minutes to determine the status after

Submit shipment status updates

submission. If Vendor Central is not showing the correct values for the shipment confirmation, open a **Contact Us** case in Vendor Central. Refer to the Business Requirements section for information about creating shipment confirmations.

The following diagram shows the integration workflow for submitting shipment status updates:

Business requirements

- Only use this API if you use your own carrier (you are a VOC vendor) to transport the shipment to the customer.
- Use this API to update the status of a shipment after the shipment is confirmed (through API or Vendor Central).
- The `trackingNumber` in the shipment status API must match the `trackingNumber` provided in the shipment confirmation. If it doesn't match, the shipment status update fails.
- One `submitShipmentStatusUpdates` call should correspond to one physical package. You can update the shipment status for several packages in one API call by batching them as an array of shipment status updates.
- A direct fulfillment order can result in several physical packages delivered to the customer. Thus, several

Special Authorization Types

shipment status updates are needed to reflect the full shipment status of the complete order.

- Vendors should send shipment status whenever possible following the Amazon Shipment Status guidelines.

INTEGRATION

Building Robust Amazon SP-API Applications

SP-API SDKs

- For scheduled delivery orders, vendors should send the `shipmentSchedule` array that specifies estimated delivery time and delivery window.

Additional fields

`statusCode` and `reasonCode` are standard codes used in EDI standards (for example, ISA X12 and EDIFACT) that are used to provide a specific status event and the reason for the status event. We expect a specific combination of `statusCode` and `reasonCode` that determine an event within the shipment transportation phase to the end customer.

These are the status and reason codes we support and their equivalency to current Vendor Central:

EDIFACT status code	EDIFACT reason code	Operational description	Vendor Central UI equivalency
404	117	Shipment is delayed because of a large scale accident	DELAYED
301	000	Shipment delivered to customer	DELIVERED
101	000	Shipment has departed the FC	DEPARTED_FROM_FC
201	000	Shipment arrived at a carrier facility	IN_TRANSIT
409	000	Carrier lost the shipment	LOST
302	000	Shipment is out for delivery	OUT_FOR_DELIVERY
407	000	Recipient refused to accept the shipment	REJECTED

SELLING PARTNER APPSTORE

What is the Selling Partner Appstore?

List Your App on the Selling Partner Appstore

EDIFACT status code	EDIFACT reason code	Operational description	Vendor Central UI equivalency
416	000	Shipment is undeliverable and will be destroyed	UNDELIVERABLE

X12 status code	X12 reason code	Operational description	Vendor Central UI equivalency
DE	AF	Shipment is delayed because of a large scale accident	DELAYED
D1	NS	Shipment delivered to customer	DELIVERED
XB	NS	Shipment has departed the FC	DEPARTED_FROM_FC
O1	NS	Shipment arrived at a carrier facility	IN_TRANSIT
CA	PL	Carrier lost the shipment	LOST
OD	NS	Shipment is out for delivery	OUT_FOR_DELIVERY
A7	AM	Recipient refused to accept the shipment	REJECTED
AP	BG	Shipment is undeliverable and will be destroyed	UNDELIVERABLE

Prerequisites

To complete this tutorial, you need:

- Authorization from the selling partner for whom you are making calls. For more information, refer to [Authorizing Selling Partner API applications](#).
- The [Direct-to-Consumer Shipping \(Restricted\)](#) role assigned to your developer profile.
- The [Direct-to-Consumer Shipping \(Restricted\)](#) role selected in the app registration page for your

application.

Submit shipment status updates

To submit shipment status updates, call the `submitShipmentStatusUpdates` operation.
